CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL, and refinery feedstocks grew by 2.0% in August 2017 compared to August 2016. This increase was driven by the OECD Americas (+2.5% y-o-y¹), where high production levels were observed in the US (+5.5% y-o-y). Indigenous production fell in both OECD Asia Oceania and OECD Europe (-5.9% and -0.3% y-o-y respectively). Overall, total OECD production grew by 1.3% in August on a year-to-date² basis.

Total OECD refinery gross output of total products grew moderately by 0.7% in August 2017 compared to August 2016. Growth in OECD Europe (+2.7% y-o-y) and OECD Asia Oceania (+0.3% y-o-y) was offset by a slight drop in refinery output in the OECD Americas (-0.5% y-o-y) due to refinery shutdowns in the US in the wake of Hurricane Harvey. The increase in refinery gross output OECD Europe was driven by high refinery output of gas/diesel oil (+2.1% y-o-y), while the increase in OECD Asia Oceania was driven by high output of naphtha (+11.8% y-o-y). Overall, total OECD refinery gross output of total products grew by 1.2% year-to-date in 2017.

Total OECD net deliveries of total products remained largely unchanged in August 2017 compared to August 2016 (-0.1% y-o-y), and showed moderate growth on a year-to-date basis (+0.9% y-t-d). All OECD regions remained fairly stable on a year-on-year basis, while the growth on a year-to-date basis was led by OECD Europe (+2.1% y-t-d). Deliveries of gas/diesel oil, total kerosene, and naphtha in OECD Europe increased strongly (+3.2%, +4.8% and +5.1% y-t-d respectively) and were countered by decreases in deliveries of LPG (-4.9% y-t-d).

Total OECD stock levels of total oil on national territory decreased by 4485kt in August 2017 and closed at 556 million metric tons. This was driven by a stock draw of primary products (-6022kt) across all OECD regions. Total OECD stock levels of total products increased by 1537kt and closed at 223 million metric tons due to increased observed in both OECD Europe and OECD Asia Oceania.

1 Year-on-year (y-o-y) change over corresponding month of previous year.

2 Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

CHART 2

Refinery gross output by OECD region

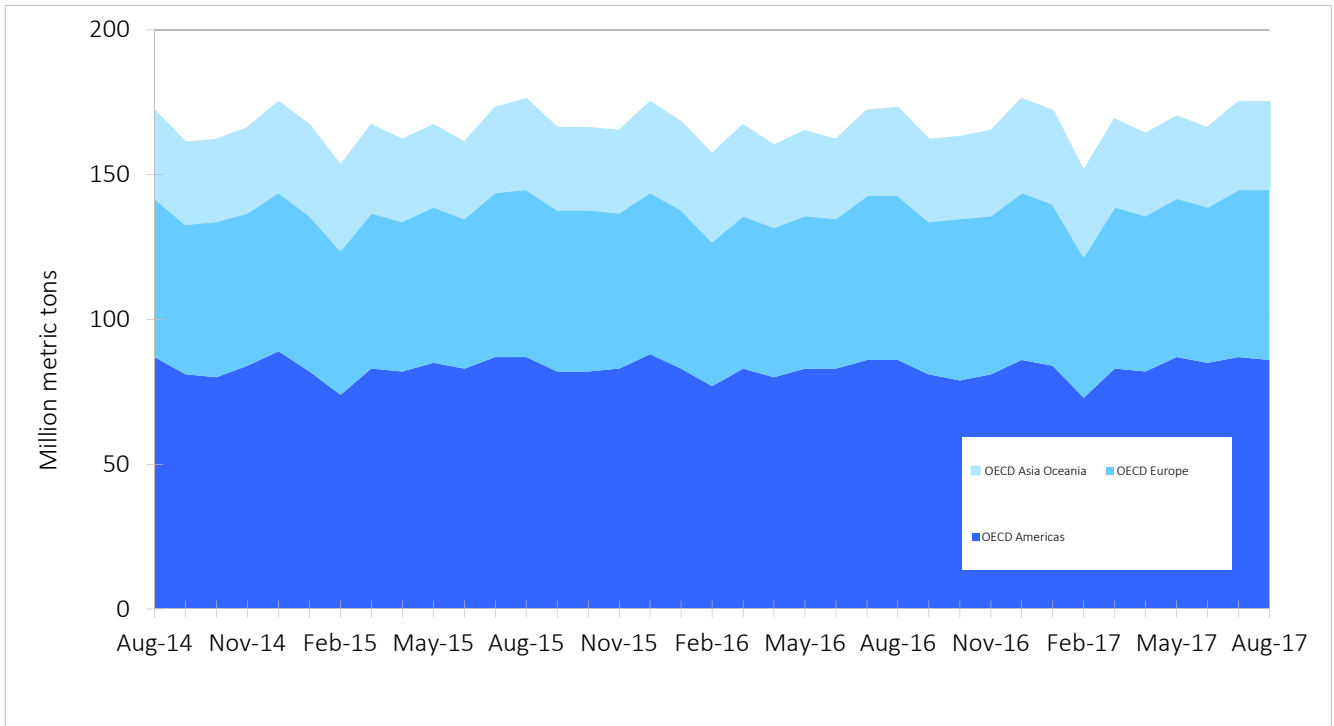

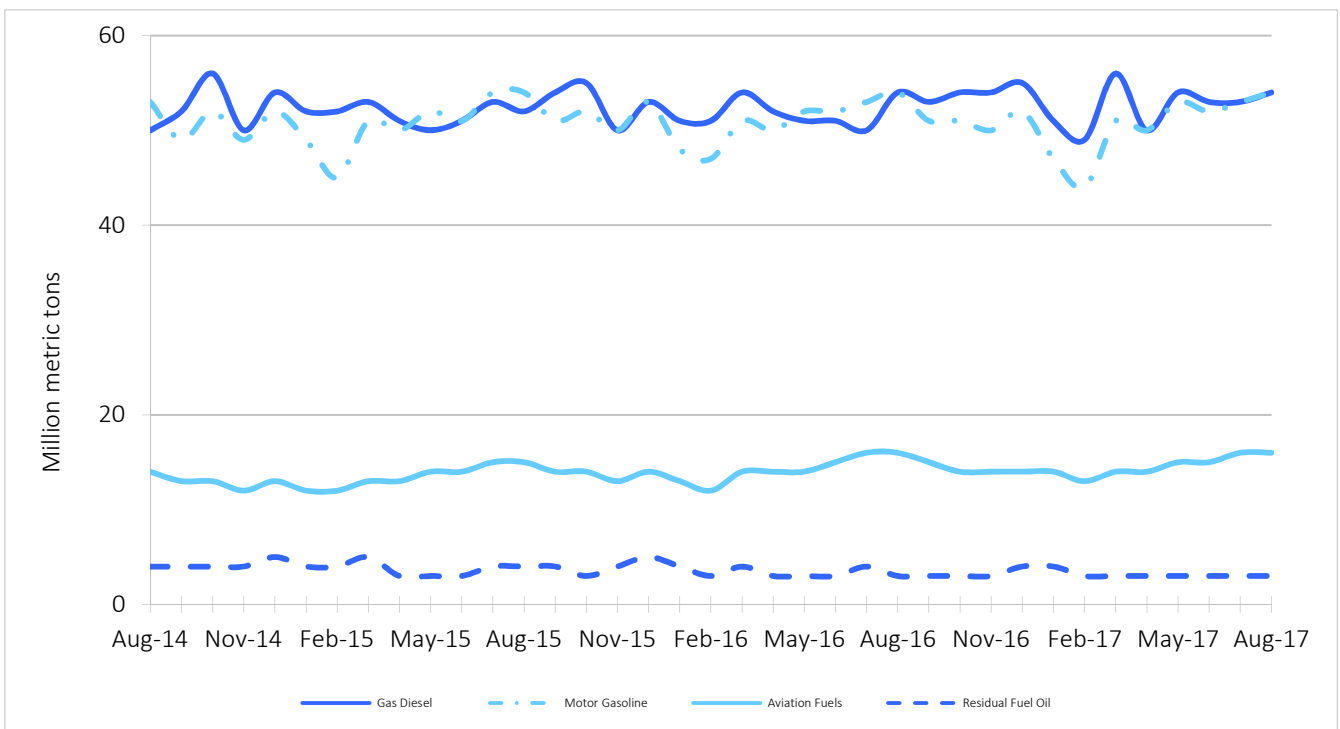

CHART 3

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Canada	August 2017
Israel	January 2010 to August 2017

2) COUNTRY NOTES

Australia	Starting from January 2017 gas/diesel oil and motor gasoline closing stock data reflect the inclusion of new companies in the Australian data collection system.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Canada	There is a break in series between December 2015 and January 2016 data as the Canadian Administration is using a new methodology from January 2016 data onwards. Under the new methodology crude oil includes condensates and pentanes plus for all flows and motor gasoline imports are better accounted for. Furthermore, reporting has been improved with an appropriate use of the flow "recycled products". Revisions to historical data are pending. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
France	Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. The trade breakdown information is not available at this time. The stocks level information is not available at this time. Revisions are pending. Petroleum coke is included by Israeli Administration in the amounts of other petroleum products. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Netherlands	As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
Sweden	In January 2017 Statistics Sweden added more companies to their new data collection system, causing a stock break between December 2016 and January 2017.
Turkey	The Turkish Administration changed its methodology of reporting marine diesel. As of January 2013, amounts of marine diesel are included under fuel oil. Prior to that month, these amounts were included under gas/diesel.

NOTES

United States Following a methodological change in the US Energy Information Administration (EIA) reporting, industry stocks of crude oil for the United States exclude crude oil lease stocks (crude oil stocks held at producing sites) beginning with data for January 2005.
