CHART 1

Gross consumption of natural gas by OECD region

OECD indigenous production of natural gas increased by 4.8% in October 2017 compared to October 2016. The increase in production was driven by the OECD Americas (+5.1% y-o-y¹), where production in the US rose by 5.2% year-on-year. Whilst OECD Asia Oceania also experienced growth in October 2017 compared to October 2016 (+15.8% y-o-y), mostly in Australia (+17.5% y-o-t), OECD Europe saw falls in indigenous production in October 2017 on a year-on-year basis (-1.3%). Overall, indigenous production of natural gas grew in the OECD (+1.3% y-t-d²) in the first ten months of 2017 compared to the same period last year.

Total OECD imports (entries)³ of natural gas fell by 1.5% in October 2017 compared to October 2016, driven by declines in both OECD Asia Oceania (-8.0% y-o-y) and the OECD Americas (-5.0% y-o-y). Within OECD Asia Oceania, decreases in imports to Korea were significant (-21.0% y-o-y), due to high imports in September and unseasonably mild weather in October. Imports to OECD Europe increased marginally in October 2017 compared to October 2016 (+0.5% y-o-y), led by Germany (+5.9% y-o-y), where additional pipeline capacity became available in October and allowed for more imports of natural gas from Russia.

Total OECD exports (exits)³ of natural gas increased by 3.4% in October 2017 compared to October 2016, bolstered by growth across all OECD regions. The rise was led by the OECD Americas, where exports in October 2017 grew by 30.4% year-on-year. Exports were particularly high from the US (+55.8% y-o-y), due to high exports of LNG.

Total OECD gross consumption of natural gas remained broadly unchanged in October 2017 compared to October 2017 (-0.4% y-o-y). Growth in the OECD Americas (+3.1% y-o-y) was slightly countered by OECD Europe and OECD Asia Oceania, where consumption fell by 5.2% and 3.4% y-o-y, respectively. Overall, total OECD gross consumption of natural gas increased marginally in the first ten months of 2017 compared to the same period last year (+0.2% y-t-d).

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

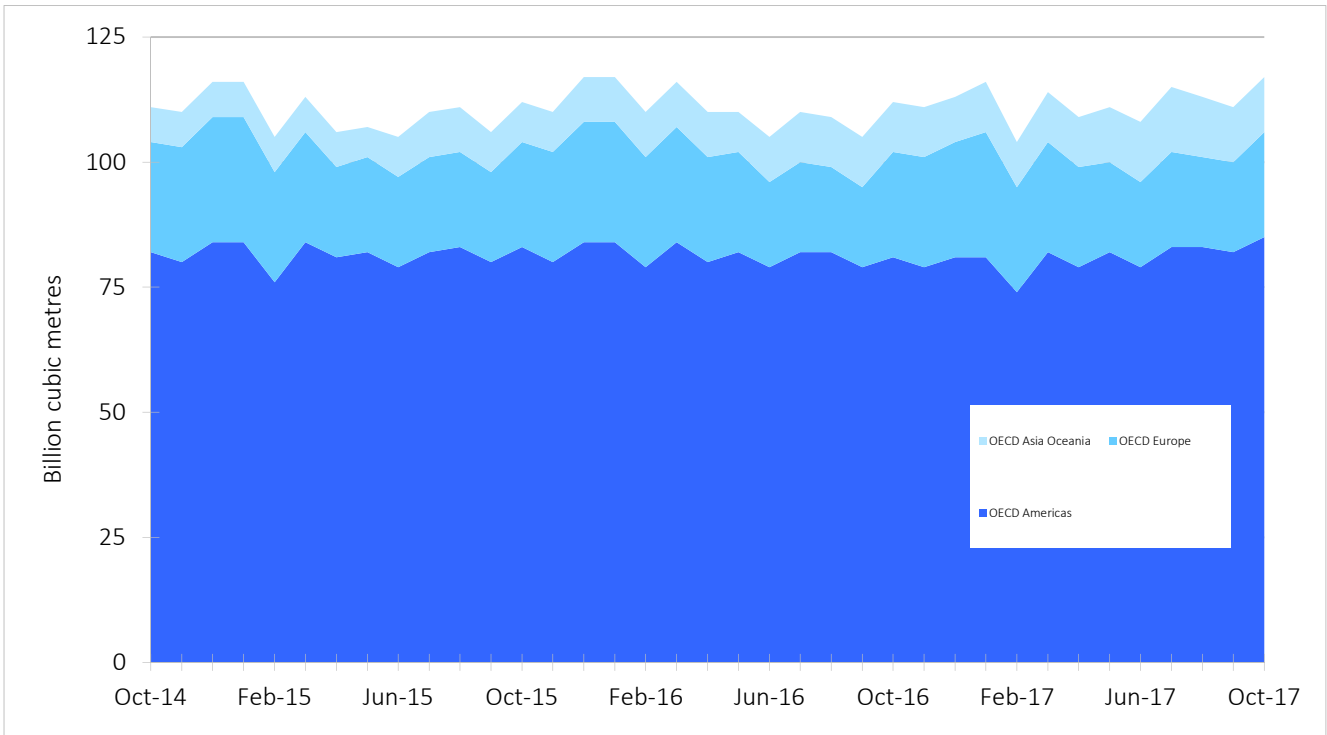

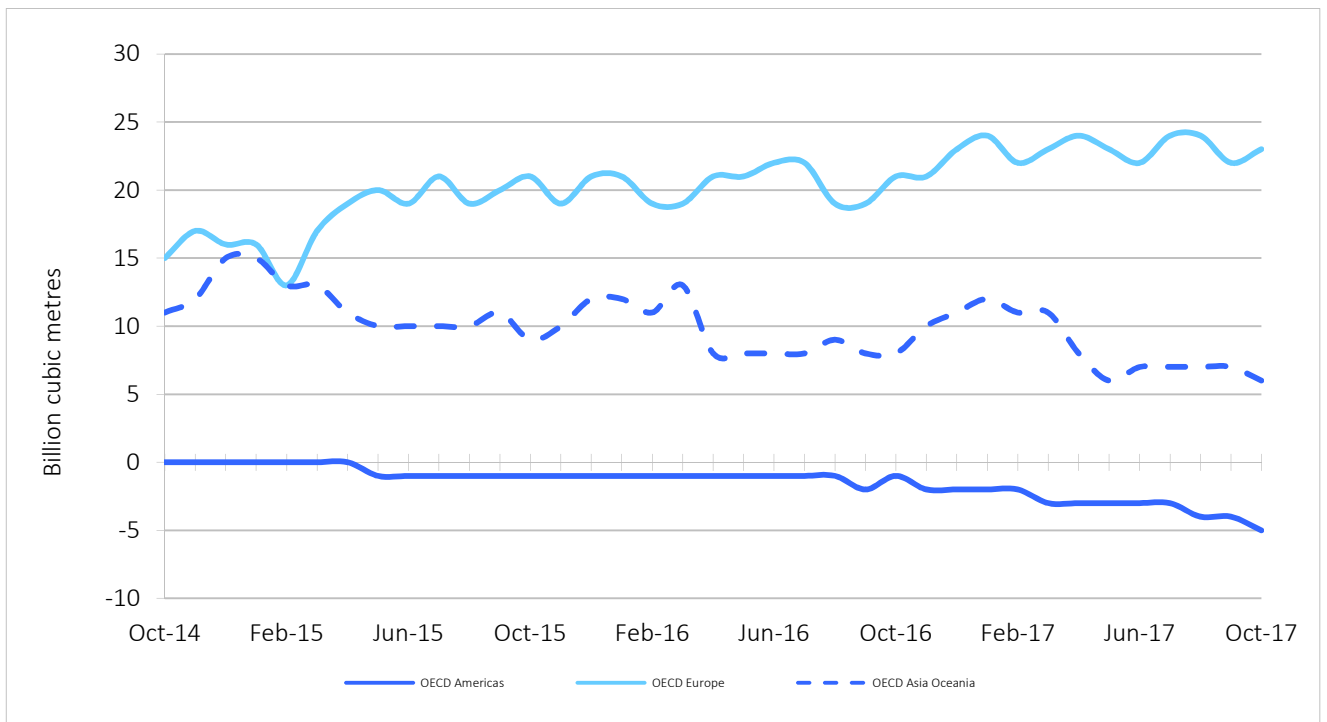

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to October 2017

2) COUNTRY NOTES

- A General Note Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country. These series are subject to revisions within the following months.
- Australia Prior to July 2015, total exports of natural gas are estimated by the administration, based on annual (July to June) and quarterly data. The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
- Belgium Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
- Canada Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- Iceland There is no natural gas data for Iceland, as there is neither production nor consumption.
- Ireland As of April 2017 there is no gas stored in Ireland. Stock figures for April-May 2017 refer to line pack gas.
- Israel The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
- Korea Following a change in reporting methodology, starting from January 2015 gross inland deliveries (observed) of natural gas include own use.
- Mexico Observed gross inland deliveries of natural gas from January 2013 onwards are estimated. Revisions are
- United Kingdom Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
