## CHART 1

### Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 6.0% in January 2018 compared to January 2017, reflecting growth across all OECD regions. The largest growth was observed in the OECD Americas (+6.8% y-o-y<sup>1</sup>), driven by the United States where production increased by 13.7% on a year-on-year basis. OECD Europe and OECD Asia Oceania increased by 1.9% and 6.6% respectively in January 2018 compared to January 2017.

Total OECD refinery gross output of total products remained relatively stable (+0.2%) in January 2018 compared to January 2017. Higher outputs of gas/diesel oil (+1.0% y-o-y) and total kerosene (+2.0% y-o-y) in the OECD as a whole were balanced by lower outputs of other products (-2.7% y-o-y) and residual fuel oil (-2.5% y-o-y). Growth in refinery gross output was observed in both OECD Europe (+0.9% y-o-y) and the OECD Americas (+0.2% y-o-y), while a decline was seen in OECD Asia Oceania (-1.1% y-o-y).

Total OECD net deliveries of total products increased by 3.1% in January 2018 compared to January 2017. The largest increase was in the OECD Americas (+5.1% y-o-y) due to a cold snap in early January 2018 in both the United States and Canada which lead to high demand of gas/diesel oil (+11.8%). OECD Asia Oceania also experienced an increase of 5.0% in January 2018, while falls were observed in OECD Europe (-1.3% y-o-y) due to less demand for gas/diesel oil (-2.9% y-o-y), particularly in Germany (-11.1%) and France (-10.7%).

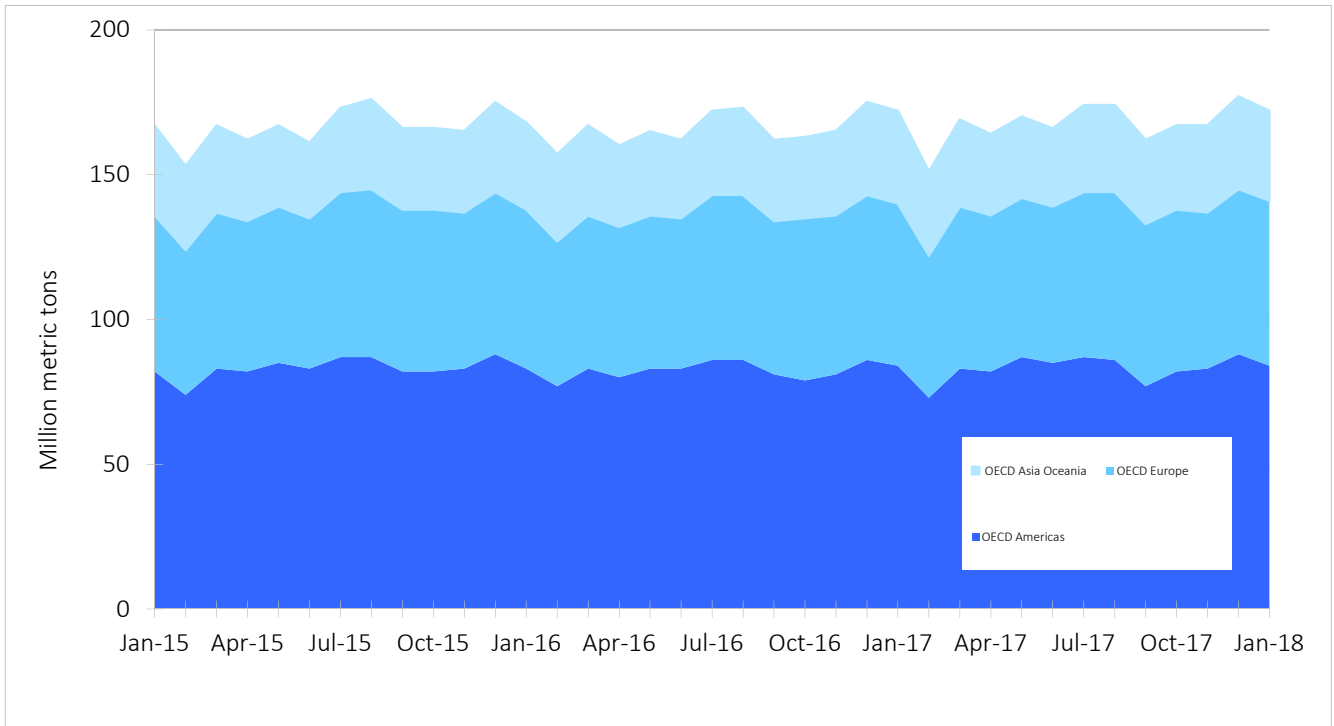

Total OECD oil stock levels on national territory increased by 3597 kt<sup>2</sup> in January 2018 compared to December 2017 and closed at 536 million metric tons. The increase was due to large growth in stocks of total products (+3325 kt), while stocks of crude oil, NGL and feedstocks only increased by 272 kt. OECD Europe experienced the largest stock build (+4996 kt), while the OECD Americas reported a decrease of 518 kt after a record drawdown of U.S. crude stockpiles at the Cushing Oklahoma delivery hub in mid-January.

<sup>1</sup> Year-on-year (y-o-y) change over corresponding month of previous year.

## NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:  
<http://www.iea.org/t&c/termsandconditions/>

### 1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to January 2018

### 2) COUNTRY NOTES

- Australia** There is a break in series between December 2017 and January 2018 due to a change in reporting methods, which involves new mandatory reporting for refineries and companies in the oil sector. There is a break in stocks between December 2016 and January 2017 for motor gasoline and gas/diesel oil as the Australian administration added new companies to their collection system. Starting from January 2017 gas/diesel oil and motor gasoline closing stock data reflect the inclusion of new companies in the Australian data collection system.
- Austria** Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Canada** The Canadian Administration includes condensates and pentanes plus under crude oil. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- France** Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
- Israel** Petroleum coke is included by Israeli Administration in the amounts of other petroleum products. The stocks level information is not available at this time. Revisions are pending. The trade breakdown information is not available at this time. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics. The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
- Mexico** Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.
- Netherlands** As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
- Sweden** In January 2016 Statistics Sweden added more companies to their new data collection system, causing a stock break between December 2015 and January 2016.

## NOTES

- Switzerland There is a break in stocks between December 2017 and January 2018 for refinery feedstocks, as more detailed information in refinery activity is collected by the national administration.
- United States US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
