CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 12.5% in September 2018 compared to September 2017, reflecting strong growth in the OECD Americas (+15.9% y-o-y¹), led by the United States (+22.4% y-o-y). Production also increased in OECD Asia Oceania (+9.7% y-o-y) where Australia experienced increases of 12.5% year-on-year. Moreover, production decreased in OECD Europe (-7.8% y-o-y) with falls in Norway (-9.2% y-o-y) and the United Kingdom (-6.1% y-o-y). Overall, total OECD production grew by 9.7% in September 2018 on a year-to-date² basis.

Total OECD refinery gross output of total products increased by 3.1% in September 2018 compared to September 2017, driven by increases in the OECD Americas (+8.1% y-o-y) and OECD Asia Oceania (+1.4% y-o-y). A notable increase in the output of gas/diesel oil was observed in both regions (+11.7% and +7.1% y-o-y respectively). A decline in refinery gross output was observed in OECD Europe due to decreases in the output of gas/diesel (-3.8% y-o-y) and other products (-6.7% y-o-y). Overall, total OECD refinery gross output remained relatively stable (-0.1% y-t-d) in the first three quarters of 2018 compared to the same period last year.

Total OECD net deliveries of total products fell by 1.0% in September 2018 compared to September 2017. Decreases in net deliveries were observed in OECD Europe (-3.5% y-o-y) and OECD Asia Oceania (-4.1% y-o-y), while growth was observed in the OECD Americas (+1.5% y-o-y) due to high demand in the United States (+1.0% y-o-y).

Total OECD oil stock levels on national territory decreased by 1172kt in September 2018 compared to August 2018 and closed at 532 million metric tons. The decrease in stocks was due to a large fall in stocks of crude oil, NGL and feedstocks (-3531kt) while stocks of total products increased by 2359kt. OECD Europe and OECD Asia Oceania experienced stock draws of 3588kt and 1394kt of total oil respectively, while the OECD Americas reported a stock build (+3810kt).

1 Year-on-year (y-o-y) change over corresponding month of previous year.

2 Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:

<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to September 2018

2) COUNTRY NOTES

Australia	There is a break in stocks between December 2016 and January 2017 for motor gasoline and gas/diesel oil as the Australian administration added new companies to their collection system. There is a break in series between December 2017 and January 2018 due to a change in reporting methods, which involves new mandatory reporting for refineries and companies in the oil sector.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat. The Canadian Administration includes condensates and pentanes plus under crude oil.
France	Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
Israel	Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics. The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. The trade breakdown information is not available at this time. The stocks level information is not available at this time. Revisions are pending. Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.
Mexico	Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.
Netherlands	As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
Sweden	There is a break in stocks for Refinery Feedstocks and Additives/Oxygenates between December 2017 and January 2018 reflecting additional information collected by the Swedish administration.
Switzerland	There is a break in stocks between December 2017 and January 2018 for refinery feedstocks, as more detailed information of refinery activity is collected by the national administration.
United States	The US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
