## CHART 1

### Gross consumption of natural gas by OECD region

OECD indigenous production of natural gas was 6.0% higher in December 2018 compared to December 2017. The main contributor to this upswing remains the OECD Americas (+7.4% y-o-y<sup>1</sup>), where the USA's natural gas production was pushed up by 11.4% year-on-year. OECD Asia Oceania also experienced significant growth (+20.5% y-o-y) led by Australia (+25.6% y-o-y), while indigenous production in OECD Europe decreased by 6.9% on a year-on-year basis. Overall, total OECD natural gas production increased by 7.3% over 2018.

Total OECD imports (entries<sup>2</sup>) of natural gas fell by 3.7% year-on-year in December 2018. A drop was observed in all OECD areas, but more significantly in OECD Europe where the entries dipped by 4.0% year-on-year. On the other hand, total OECD LNG imports increased by 15.7% year-on-year, driven by increases observed in OECD Europe (68.6% y-o-y).

Total OECD exports (exits<sup>2</sup>) of natural gas declined by 6.3% year-on-year in December 2018. While OECD Asia Oceania and the OECD Americas increased their exports by 25.3% and 7.4% year-on-year respectively, OECD Europe drove the overall imports down with a 15.7% decrease in December 2018 compared to December 2017. However, total OECD LNG exports grew by 34.2% year-on-year, reflecting increases observed in all OECD regions.

Total OECD gross consumption of natural gas shrunk by 7.6% year-on-year, driven by both the OECD Americas (-8.8% y-o-y) and OECD Europe (-7.7% y-o-y). The principal countries responsible for the plunge were Canada (-42.3% y-o-y) and the USA (-3.1% y-o-y) in North America and Germany (-28.6% y-o-y) in Europe. On a year-to-date basis, however, total OECD gross consumption of natural gas increased by 3.2% in 2018.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Transit volumes are included. Trade amounts include intra-regional trade.

3. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

## NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:  
<http://www.iea.org/t&c/termsandconditions/>

### 1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to December 2018

### 2) COUNTRY NOTES

- A General Note Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
- Australia The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
- Austria Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Belgium Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
- Canada Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- Iceland There is no natural gas data for Iceland, as there is neither production nor consumption.
- Ireland There is a break in stocks between December 2016 and January 2017, caused by withdrawal of cushion gas from storage facilities due to the decommissioning of operations. As of May 2017 there is no gas stored in Ireland.
- Israel The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
- Korea Following a change in reporting methodology, starting from January 2015 gross inland deliveries (observed) of
- Mexico Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
- United Kingdom Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
