CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 10.2% in December 2018 compared to December 2017, reflecting growth across all OECD regions. The largest growth was observed in the OECD Americas (+9.6% y-o-y¹), where the United States continued its upward trend in production and increased by 19.1% compared to December 2017. OECD Europe also experienced significant growth (+10.2% y-o-y), due to multiple new projects on the United Kingdom Continental Shelf coming online in late 2017 (+46.5% y-o-y). Overall, total OECD production grew by 9.6% in 2018 on an annual basis.

Total OECD refinery gross output of total products remained relatively stable (-0.3% y-o-y) in December 2018 compared to December 2017. The output of total products decreased in both OECD Asia Oceania (-2.3% y-o-y) and OECD Europe (-0.6% y-o-y), and increased marginally in the OECD Americas (+0.7% y-o-y). Decreases in the output of total gasoline were observed across all OECD regions, particularly in the OECD Americas (-1.0% y-o-y).

Total OECD net deliveries of total products decreased by 2.4% in December 2018 compared to December 2017, reflecting falls across all OECD regions, particularly in OECD Asia Oceania (-5.3% y-o-y) and OECD Europe (-3.4% y-o-y). However, net deliveries showed a 1.0% increase on an annual basis. Annual growth in net deliveries occurred in the OECD Americas (+2.4% y-t-d) and OECD Europe (0.1% y-t-d), while a decrease occurred in OECD Asia Oceania (-1.6% y-t-d).

Total OECD oil stock levels on national territory increased by 2462 kt in December 2018 compared to November 2018 and closed at 532 million metric tons. The increase was due to large builds of stocks of total products (+5876 kt) in total OECD, particularly for middle distillates (+4932 kt). Stocks of crude oil, NGL and feedstocks decreased by 3414 kt, reflecting stock draws across all OECD regions.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

Refinery gross output by OECD region

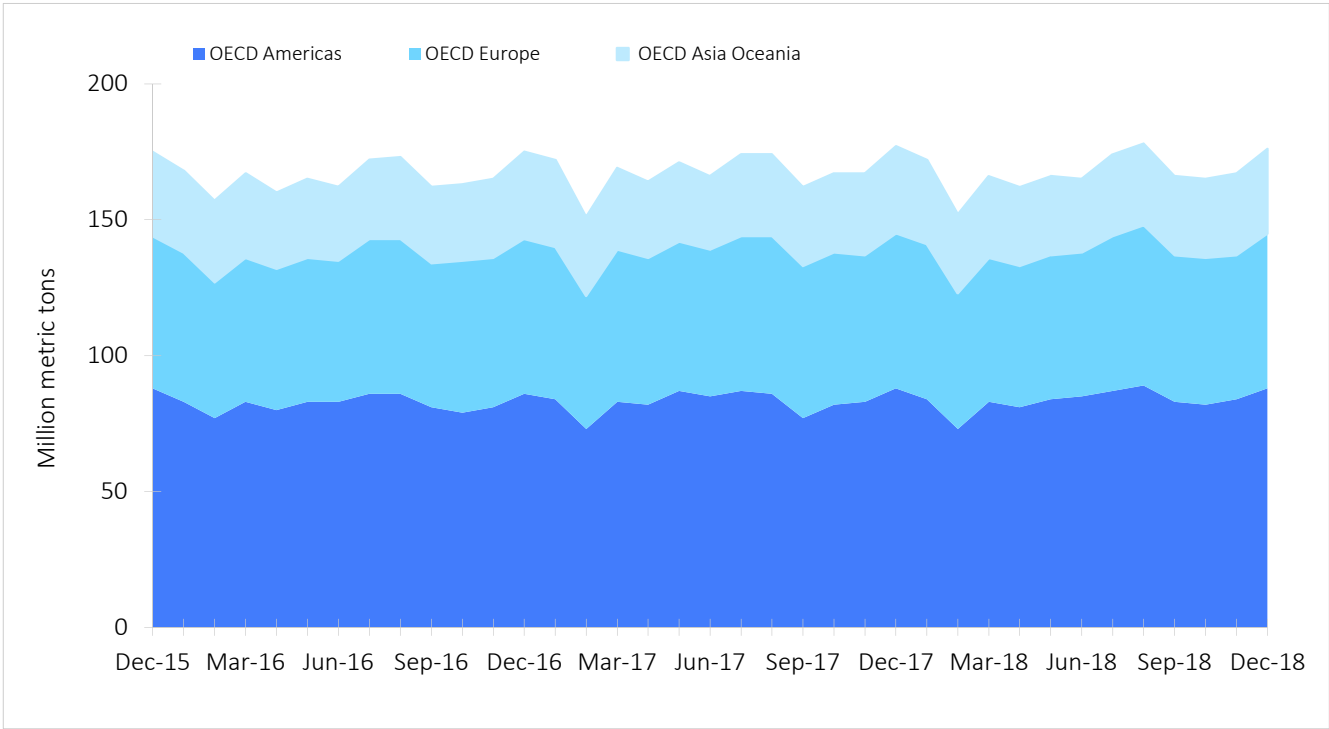

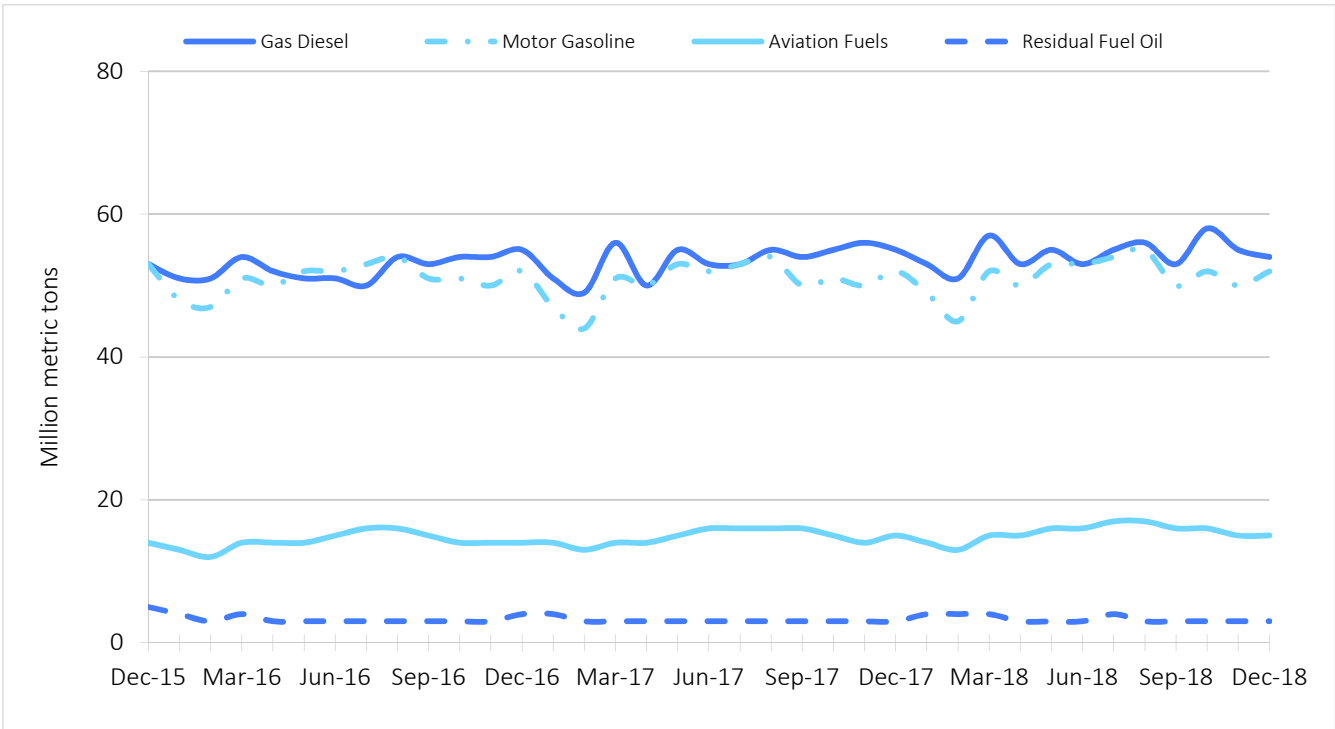

CHART 3

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

New Zealand	December 2018
Israel	January 2010 to December 2018

2) COUNTRY NOTES

Australia	There is a break in stocks between December 2016 and January 2017 for motor gasoline and gas/diesel oil as the Australian administration added new companies to their collection system. There is a break in series between December 2017 and January 2018 due to a change in reporting methods, which involves new mandatory reporting for refineries and companies in the oil sector.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat. The Canadian Administration includes condensates and pentanes plus under crude oil.
France	Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
Israel	The stocks level information is not available at this time. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics. The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. The trade breakdown information is not available at this time. Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.
Mexico	Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.
Netherlands	As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
Sweden	There is a break in stocks for Refinery Feedstocks and Additives/Oxygenates between December 2017 and January 2018 reflecting additional information collected by the Swedish administration.
Switzerland	There is a break in stocks between December 2017 and January 2018 for refinery feedstocks, as more detailed information of refinery activity is collected by the national administration.

NOTES

United States The US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
