CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas increased by 8.5% in February 2019 compared to February 2018. The increase was driven by the OECD Americas (+10.4% y-o-y¹), in absolute terms, where production in the United States grew by 12.4% y-o-y. OECD Asia Oceania's growth (+11.4% y-o-y) was mainly driven by Australia (14.2% y-o-y). Meanwhile, OECD Europe fell slightly (-0.8% y-o-y), as Ireland's output declined by 23.4%. Overall, production in total OECD was 8.6% higher in the first two months of 2019 compared to the same period last year.

Total OECD gross consumption of natural gas slightly decreased by 0.1% in February 2019 compared to February 2018. Growth in the OECD Americas (+7.9% y-o-y) was offset by declines in OECD Europe (-10.8% y-o-y) and OECD Asia Oceania (-4.1% y-o-y). The unseasonably warm temperatures across Europe in February 2019 compared to last year led to this significant drop in gas consumption. The UK, France, the Netherlands and Italy were the countries which experienced the largest declines on a year-on-year basis (-15.2%, -20.4%, -17.9% and -10.2% y-o-y, respectively).

Total OECD imports (entries²) of natural gas (pipeline and LNG) decreased by 7.0% in February 2019 versus February 2018, due to lower quantities imported by OECD Europe (-6.5% y-o-y) and OECD Asia Oceania (-15.4% y-o-y), while imports by the OECD Americas were slightly higher (+4.1% y-o-y). Total OECD exports (exits²) of natural gas (pipeline and LNG) were 7.8% lower year-on-year in February 2019. Growth in export levels in the OECD Americas (+15.1% y-o-y) and Asia Oceania (+3.8% y-o-y) could not compensate the strong decline in OECD Europe (-17.6% y-o-y), reported for both pipeline (-17.0% y-o-y) and LNG (-54.1% y-o-y).

For net trade of natural gas, year-to-date figures show a 1.7% increase for total OECD, mainly due to higher net imports to OECD Europe (+22.9% y-t-d³). However, net imports to OECD Asia Oceania were lower by 23.8% in the first two months of 2019 compared to 2018. The OECD Americas continued to increase its net exports (+51.9% y-t-d).

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Transit volumes are included. Trade amounts include intra-regional trade.

3. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

CHART 2

Indigenous production of natural gas by OECD region

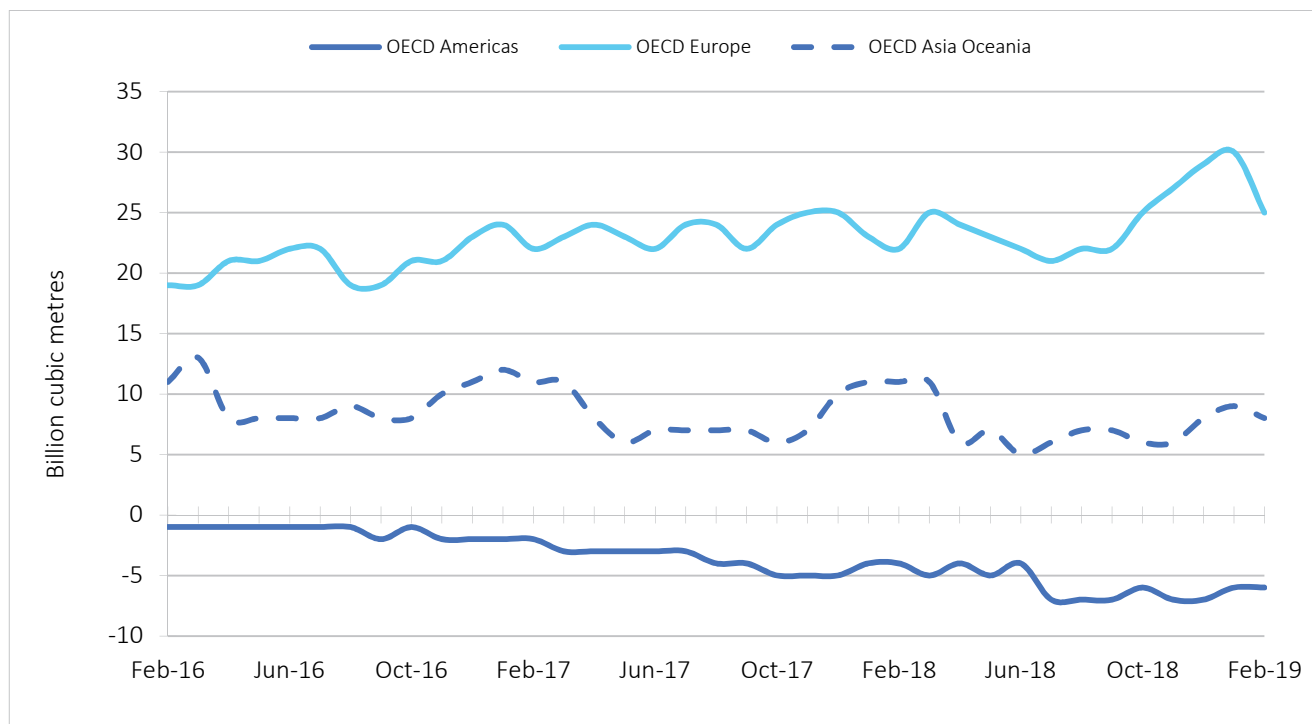

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to February 2019

2) COUNTRY NOTES

- A General Note Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
- Australia The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
- Austria Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Belgium Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
- Canada Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- Finland Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
- Iceland There is no natural gas data for Iceland, as there is neither production nor consumption.
- Israel The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
- Mexico Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
- Netherlands There is a break in stocks between December 2017 and January 2018 due to better compilation methods in the Dutch administration's new data reporting system.
- United Kingdom Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
