## CHART 1

### Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 6.3% in March 2019 compared to March 2018. This growth was again led by the OECD Americas (7.1% y-o-y<sup>1</sup>), where the United States continued to have considerable growth year-on-year (+13.5%). Growth was also observed in both OECD Asia Oceania (+7.3% y-o-y) and OECD Europe (+0.9% y-o-y), where Australia and the UK experienced growth (+9.1% and +16.5% y-o-y respectively). Overall, total OECD production grew by 6.9% in the first quarter of 2019 compared to the same period of last year.

Total OECD refinery gross output of total products grew by 0.9% in March 2019 compared to March 2018. Increases were observed in both OECD Europe (+2.9% y-o-y) and OECD Asia Oceania (+3.8% y-o-y), mostly due to an increase in the output of gas/diesel oil in both regions (+5.0% and +11.5% y-o-y respectively). A decrease in refinery gross output was observed in the OECD Americas (-1.5% y-o-y), where the output of total motor gasoline decreased by 4.1% year-on-year.

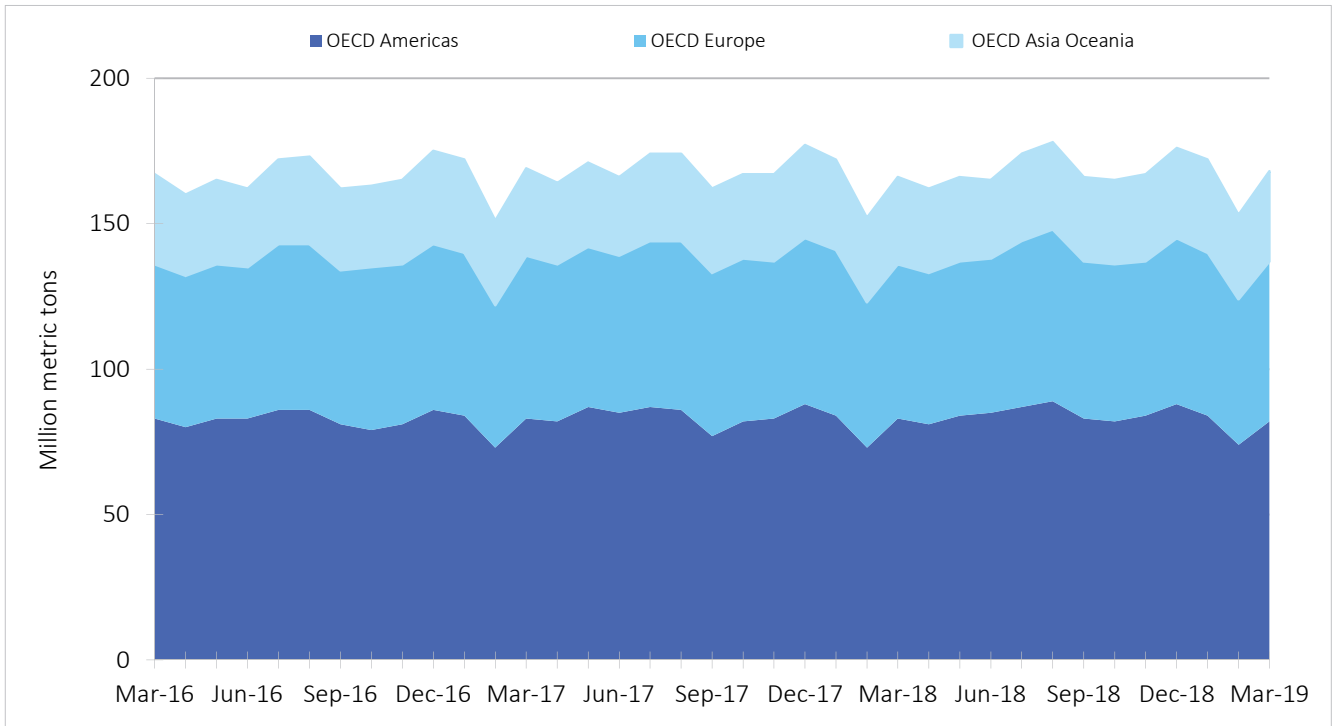

Total OECD net deliveries of total products decreased by 3.3% in March 2019 compared to March 2018. Decreases in demand for almost all products were observed in all OECD regions. The OECD Americas experienced the largest decrease in net deliveries in absolute terms (-2.6% y-o-y), followed by OECD Europe (-3.8% y-o-y) and OECD Asia Oceania (-4.4% y-o-y). Both the OECD Americas and OECD Asia Oceania saw the largest decreases for total gasoline (-3.3% and -5.9% y-o-y respectively), while the biggest fall seen in OECD Europe was for gas/diesel oil (-5.3% y-o-y). Overall, total OECD net deliveries decreased by 1.5% in the first quarter of 2019 compared to the same period of last year.

Total OECD oil stock levels on national territory fell by 1364 kt in March 2019 compared to February 2019 and closed at 533 million metric tons. A significant stock draw in OECD Asia Oceania (-2036 kt) was only partially offset by a build in OECD Europe (+737 kt) and a minimal change in the OECD Americas (-65 kt). The decrease in OECD Asia Oceania came from a large stock draw of primary products (-1660 kt), particularly in Korea (-1347 kt).

1. Year-on-year (y-o-y) change over corresponding month of previous year.

## NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:  
<http://www.iea.org/t&c/termsandconditions/>

### 1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to March 2019

### 2) COUNTRY NOTES

- Australia** There is a break in series between December 2017 and January 2018 due to a change in reporting methods, which involves new mandatory reporting for refineries and companies in the oil sector.
- Austria** Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Canada** Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- There is a break in series between December 2018 and January 2019 as the Canadian Administration launched a new Monthly Refined Petroleum Products survey in the beginning of 2019. The survey includes greater coverage of all products.
- The Canadian Administration includes condensates and pentanes plus under crude oil.
- France** Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
- Israel** Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
- The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
- The stocks level information is not available at this time.
- The trade breakdown information is not available at this time.
- Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.
- Mexico** Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.
- Netherlands** As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
- Sweden** There is a break in stocks for Refinery Feedstocks and Additives/Oxygenates between December 2017 and January 2018 reflecting additional information collected by the Swedish administration.
- Switzerland** There is a break in stocks between December 2017 and January 2018 for refinery feedstocks, as more detailed information of refinery activity is collected by the national administration.

## NOTES

United States The US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
