CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas grew by 8.2% in the first quarter of 2019 compared to the same period last year, driven by an increase in the OECD Americas (+9.8% y-t-d¹) and OECD Asia Oceania (+15.2% y-t-d), while production in OECD Europe declined by 2.7% on a year-to-date basis. Similar trends were observed on a year-on-year basis, where the USA's natural gas production increased by 11.5% in March 2019 reaching 79 bcm, driving the increase in the OECD Americas (+8.7% y-o-y²). OECD Asia Oceania also experienced significant growth (+19.8% y-o-y) led by Australia (+24.6% y-o-y), while indigenous production in OECD Europe decreased by 5.4% on a year-on-year basis in March 2019.

Total OECD gross consumption of natural gas increased by 1.6% in the first quarter of 2019 compared to the same period in 2018, driven by an increase in the OECD Americas (5.2% y-t-d). Similarly, on a year-on-year basis, growth in natural gas gross deliveries in the OECD Americas (+4.1% y-o-y) in March 2019 could not compensate the strong decline in OECD Europe (-11.8% y-o-y) and OECD Asia Oceania (-3.4% y-o-y).

Total OECD imports (entries)³ of natural gas (pipeline and LNG) remained broadly stable (+0.6% y-o-y) in March 2019, as higher entries of LNG (23.8% y-o-y) were offset by lower quantities imported by pipeline (-6.7% y-o-y). Total OECD imports of LNG from non-OECD countries were 14.3% higher in March 2019 compared to March 2018, while LNG imports from OECD countries increased remarkably by 48.9% year-on-year.

Total OECD exports (exits)³ of natural gas (pipeline and LNG) grew by 3.5% year-on-year in March 2019, reflecting the higher exits of LNG (43.8% y-o-y), observed across all OECD regions. Total OECD exports of LNG were higher to both OECD and non-OECD countries by 33.1% and 61.8% respectively.

1. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

2. Year-on-year (y-o-y) change over corresponding month of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

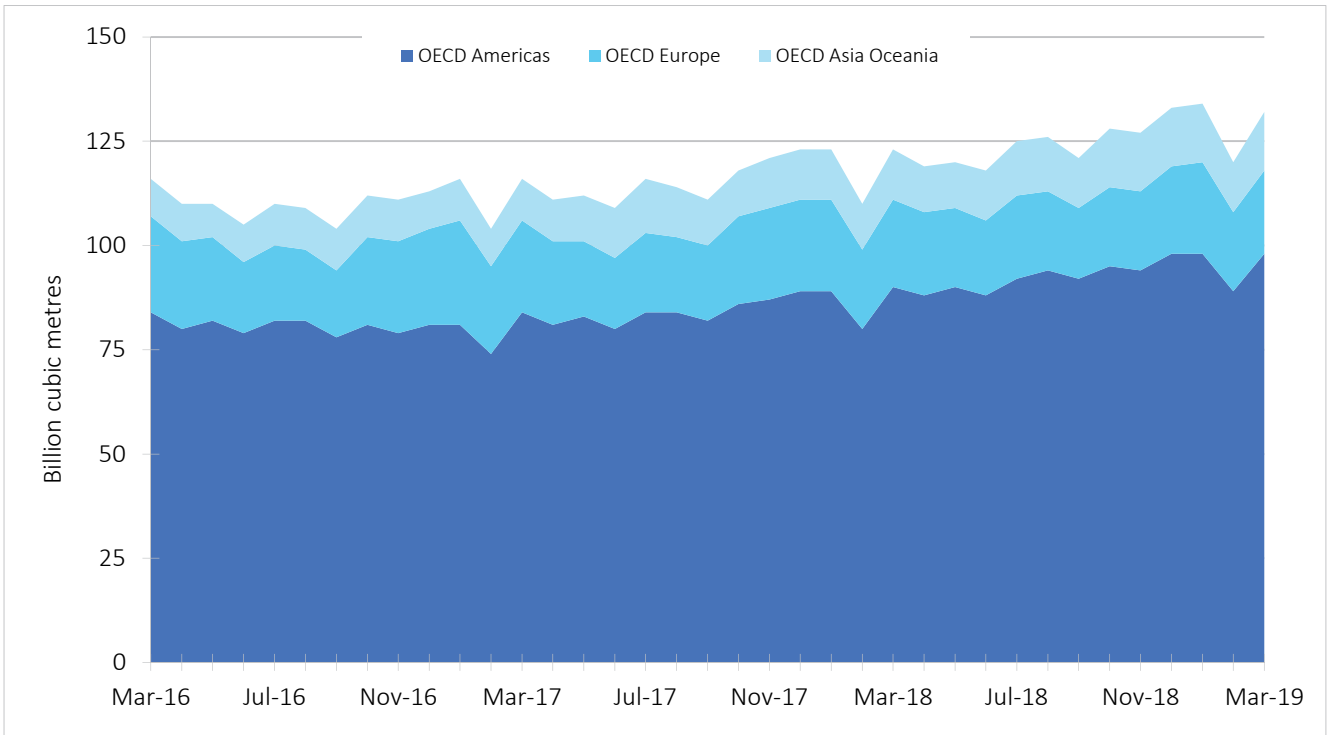

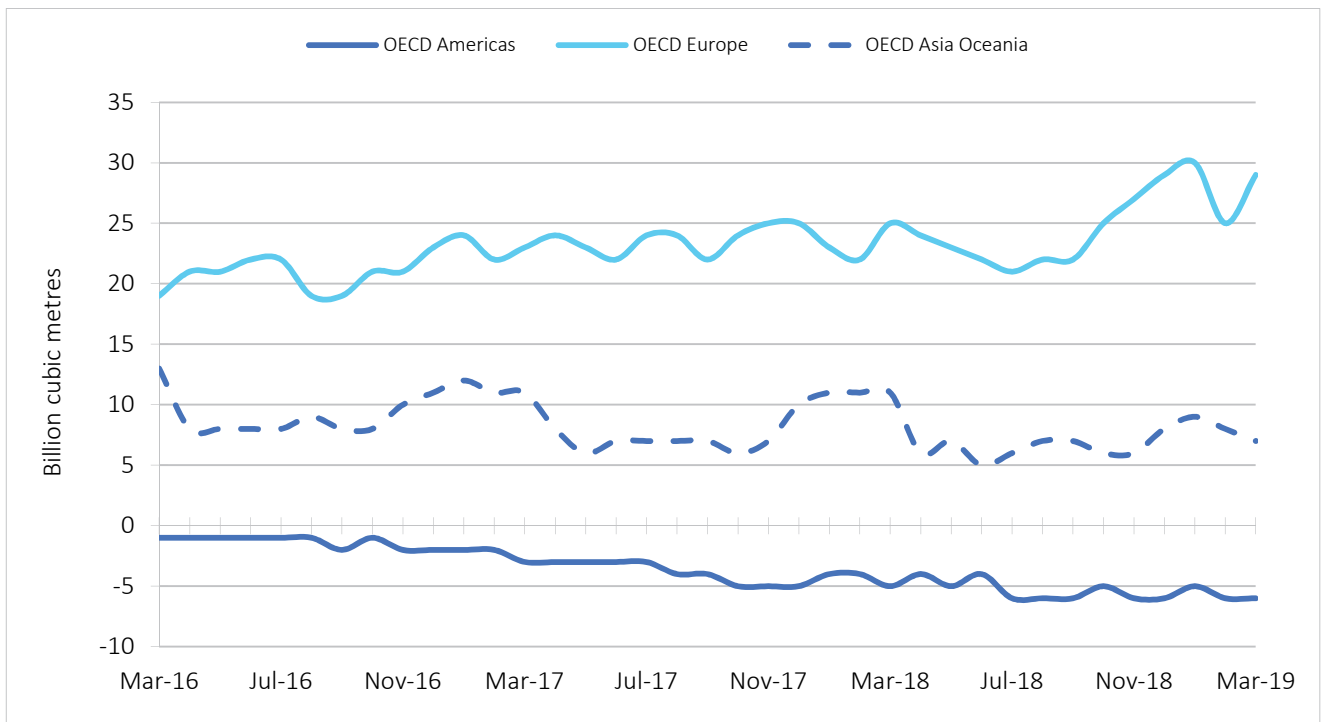

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to March 2019

2) COUNTRY NOTES

- A General Note Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
- Australia The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
- Austria Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Belgium Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
- Canada Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- Finland Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
- Iceland There is no natural gas data for Iceland, as there is neither production nor consumption.
- Israel The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
- Mexico Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
- Netherlands Starting with January 2019, more complete trade data is reported based on better information from the GATE terminal. Revisions for historical series are pending. There is a break in stocks between December 2017 and January 2018 due to better compilation methods in the Dutch administration's new data reporting system.
- United Kingdom Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
