CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks declined by 1.1% in March 2017 compared to March 2016. The drop was driven by lower production in the OECD Americas (-1.8% y-o-y¹) and in OECD Asia Oceania (-6.0% y-o-y). In OECD Europe production grew by 3.4% on a year on year basis mainly due to higher production in Norway (+8.4% y-o-y). On a year to date² basis total OECD production of primary products decreased by 2.1% in the first quarter of 2017 mainly as a result of lower production in the OECD Americas.

Total OECD refinery gross output of total products increased by 0.8% in March 2017 compared to the same month last year due to higher output of naphtha and total kerosene (+14.6% and +4.6% respectively). On a regional level, the increase was driven by OECD Europe (+4.5% y-o-y), while output declined in the OECD Americas (-0.5% y-o-y) and OECD Asia Oceania (-2.3% y-o-y). Overall refinery gross output was slightly down (-0.3% y-t-d) in the first quarter of 2017 compared to the first quarter of 2016.

Total OECD net deliveries of total products increased in March 2017 (+1.5% y-o-y), with higher deliveries in all OECD regions. The increase was driven by high deliveries of gas/diesel oil (+3.5% y-o-y) especially in Australia (+15.7% y-o-y), Canada (+18.4% y-o-y) and Poland (+22.6% y-o-y). On a year to date basis, total OECD net deliveries of total products were down by 1% compared to last year.

Total OECD stocks level on national territory of total oil dropped by 2,821kt during March 2017 with decreases in all OECD regions due to large stock draw of total products (-4,496kt). Stocks of crude oil, NGL and feedstocks grew in March 2017 with large stock builds in the United States (+1,353kt) and Korea (+863kt).

1 Year-on-year (y-o-y) change over corresponding month of previous year.

2 Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to March 2017

2) COUNTRY NOTES

- Austria** Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Canada** There is a break in series between December 2015 and January 2016 data as the Canadian Administration is using a new methodology from January 2016 data onwards. Under the new methodology crude oil includes condensates and pentanes plus for all flows and motor gasoline imports are better accounted for. Furthermore, reporting has been improved with an appropriate use of the flow "recycled products". Revisions to historical data are pending.
 Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- France** Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
- Israel** The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
 The trade breakdown information is not available at this time.
 The stocks level information is not available at this time. Revisions are pending.
 Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.
 Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
- Netherlands** As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
- Sweden** In January 2017 Statistics Sweden added more companies to their new data collection system, causing a stock break between December 2016 and January 2017.
- Turkey** The Turkish Administration changed its methodology of reporting marine diesel. As of January 2013, amounts of marine diesel are included under fuel oil. Prior to that month, these amounts were included under gas/diesel.
- United States** Following a methodological change in the US Energy Information Administration (EIA) reporting, industry stocks of crude oil for the United States exclude crude oil lease stocks (crude oil stocks held at producing sites) beginning with data for January 2005.
