## CHART 1

### Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 7.7% in May 2019 compared to May 2018. The OECD Americas continued to lead this growth (+8.8% y-o-y<sup>1</sup>), where the United States experienced production growth of 15.6% year-on-year. Growth was also observed in OECD Asia Oceania (+28.8% y-o-y) due to high production on condensates in Australia (+34.0% y-o-y), while production in OECD Europe decreased (-1.1% y-o-y) led by a decrease in Norway (-3.3% y-o-y). Overall, total OECD production grew by 7.6% in the first five months of 2019 compared to the same period of last year.

Total OECD refinery gross output of total products decreased by 0.7% in May 2019 compared to May 2018. Decreases were observed in both OECD Asia Oceania (-2.8% y-o-y) and the OECD Americas (-0.5% y-o-y), while output from OECD Europe remained mostly unchanged (+0.1% y-o-y). Large decreases in the output of residual fuel oil were observed across all OECD regions (-17.8% y-o-y in total OECD), while overall increases were observed for gas/diesel oil (+3.9% y-o-y in total OECD).

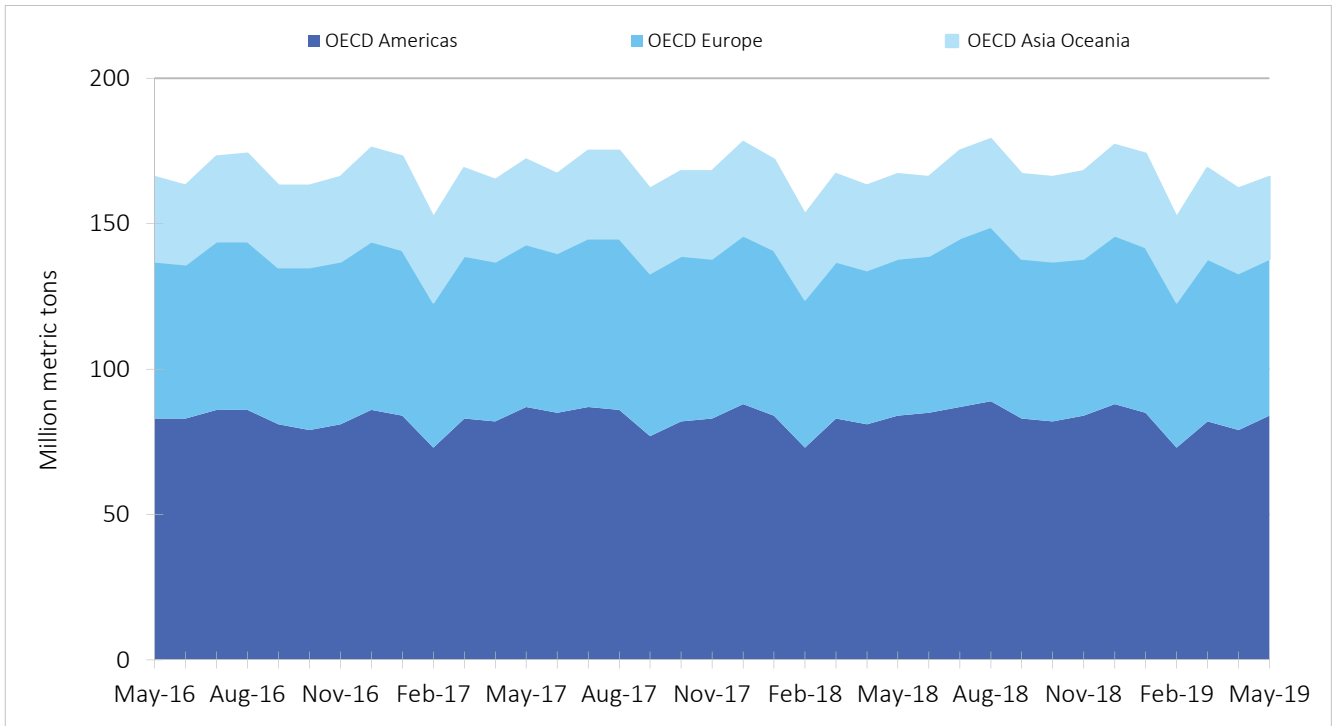

Total OECD net deliveries of total products decreased by 1.8% in May 2019 compared to May 2018. Decreases in demand for almost all products were observed in all OECD regions. OECD Asia Oceania experienced the large decrease in net deliveries (-5.1% y-o-y), followed by the OECD Americas (-1.4% y-o-y) and OECD Europe (-0.9% y-o-y). Both OECD Europe and OECD Asia Oceania saw the largest decreases for naphtha (-17.4% and -9.1% y-o-y respectively), while the biggest fall seen in the OECD Americas was for gas/diesel oil (-3.5% y-o-y). Overall, total OECD net deliveries decreased by 1.1% in the first five months of 2019 compared to the same period of last year.

Total OECD oil stock levels on national territory grew by 3091 kt in May 2019 compared to April 2019 and closed at 539 million metric tons. A significant stock build in the OECD Americas (+3580 kt) was only partially offset by a draw in OECD Europe (-1036 kt), while stocks in OECD Asia Oceania changed minimally (+547 kt). The stock build in the OECD Americas came from large stock build of both primary and secondary products (+1365 kt and +2680 kt respectively) in the United States.

<sup>1</sup> Year-on-year (y-o-y) change over corresponding month of previous year.

## NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:  
<http://www.iea.org/t&c/termsandconditions/>

### 1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to May 2019

### 2) COUNTRY NOTES

- Australia** There is a break in series between December 2017 and January 2018 due to a change in reporting methods, which involves new mandatory reporting for refineries and companies in the oil sector.
- Austria** Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Canada** There is a break in series between December 2018 and January 2019 as the Canadian Administration launched a new Monthly Refined Petroleum Products survey in the beginning of 2019. The survey includes greater coverage of all products. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat. As of January 2019, Canadian data includes outputs of secondary products from bitumen upgraders. These are reported under "from other sources" under other hydrocarbons, and in "primary product receipts" for refinery gas, gas/diesel oil and petroleum coke. The Canadian Administration includes condensates and pentanes plus under crude oil.
- France** Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
- Israel** Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics. The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. The stocks level information is not available at this time. The trade breakdown information is not available at this time. Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.
- Mexico** Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.
- Netherlands** As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
- Sweden** There is a break in stocks for Refinery Feedstocks and Additives/Oxygenates between December 2017 and January 2018 reflecting additional information collected by the Swedish administration.

## NOTES

- Switzerland There is a break in stocks between December 2017 and January 2018 for refinery feedstocks, as more detailed information of refinery activity is collected by the national administration.
- United States The US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
