CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas was 8.1% higher in June 2019 compared to June 2018, driven by the OECD Americas (+8.5% y-o-y¹), and more specifically the United States (+11.5% y-o-y). OECD Asia Oceania also increased indigenous production (+20.4% y-o-y), with Australia being the major contributor (+22.2% y-o-y). OECD Europe production was lower in June 2019 (-2.7% y-o-y). Indigenous production from January to June 2019 increased by 8.3% for total OECD when compared with the same period in 2018, with the highest growth in OECD Asia Oceania (19.8% y-t-d²).

Total OECD imports (entries)³ of natural gas grew by 3.6% on a year-on-year basis, especially in the OECD Europe (+7.6% y-o-y), while decreases were observed in both the OECD Americas (-10.3% y-o-y) and OECD Asia Oceania (-4.4% y-o-y). While pipeline imports slightly dropped (-0.7% y-o-y), LNG imports to total OECD continued to grow (+19.0% y-o-y). Comparing the first six months of 2019 with the same period of 2018, imports increased by 3.1%, driven by the increase of LNG trade (+23.1% y-t-d).

Total exports (exits)³ of natural gas increased in all OECD regions in June 2019 compared to June 2018 (+9.6% y-o-y for total OECD), with an increase of exports to non-OECD countries (+31.1% y-o-y). Exports of LNG increased by 29.2% over the time period for total OECD. In the OECD Americas, LNG exports increased by 93.1% as a result of the commissioning of new LNG infrastructures in the United States. Total OECD exports for the first half of 2019 had a growth of 5.3% when compared to the same period of 2018, related to an increase of LNG exports (+38.2% y-t-d).

Gross consumption of natural gas increased in all OECD regions (+4.3% y-o-y for total OECD) in June 2019 compared to June 2018. The highest growth was seen in OECD Asia Oceania (+20.2% y-o-y), resulting from increases in consumption in Australia (+49.8% y-o-y) and Japan (+23.2% y-o-y). Overall, total OECD consumption of natural gas grew by 2.2% in the first six months of 2019 compared to the same period of 2018.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

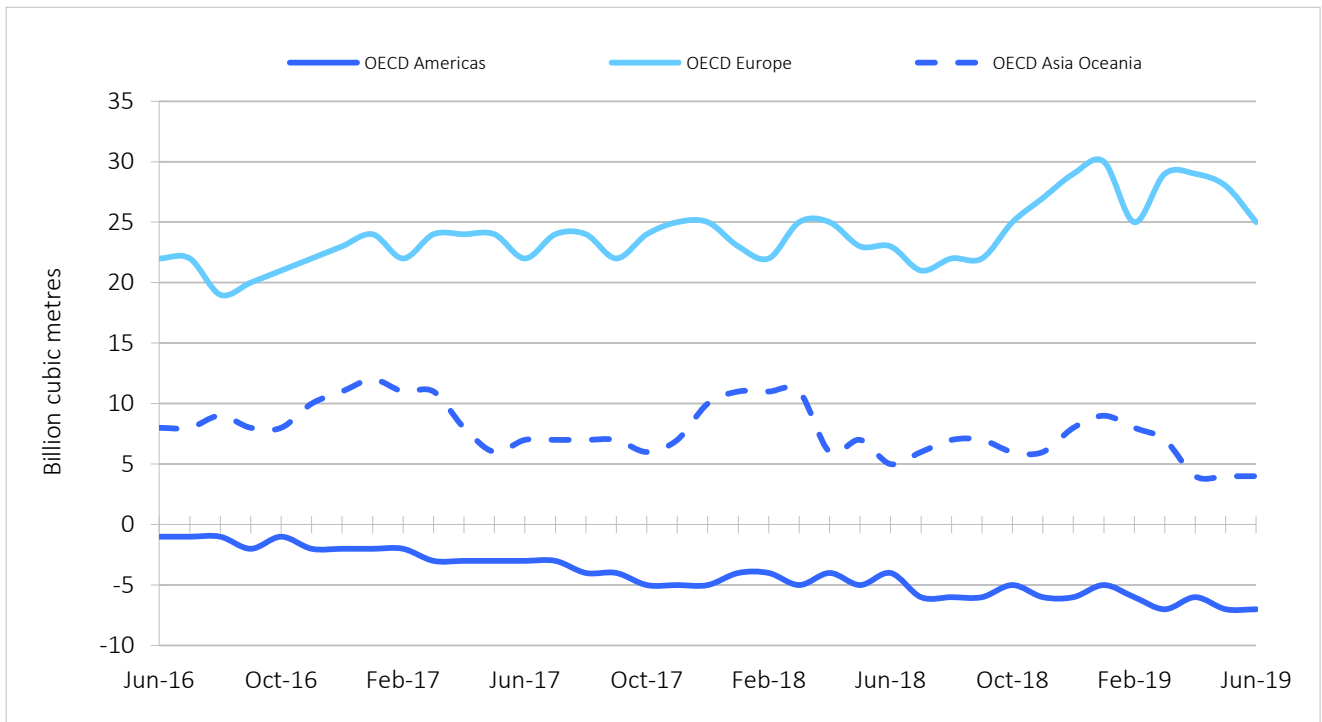

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to June 2019

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Finland	Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Netherlands	Starting with January 2019, more complete trade data is reported based on better information from the GATE terminal. Revisions for historical series are pending. There is a break in stocks between December 2017 and January 2018 due to better compilation methods in the Dutch administration's new data reporting system.
United Kingdom	Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
