CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 11.1% in June 2019 compared to June 2018. Following past months trends, the OECD Americas led this growth (+14.6% y-o-y¹), mainly due to the United States production increase of 21.0% year-on-year. Significant growth was also observed in OECD Asia Oceania (+25.8% y-o-y) due to high production in Australia (+30.6% y-o-y). Meanwhile, production in OECD Europe decreased (-13.4% y-o-y), led by a production decrease in Norway (-25.6% y-o-y) due to technical problems and maintenance works in some fields. Overall, total OECD production grew by 8.3% in the first half of 2019 compared to the first half of 2018.

Total OECD refinery gross output of total products decreased by 1.6% in June 2019 compared to June 2018. This decrease was driven by residual fuel oil output (-11.2% y-o-y) and gasoline output (-2.3% y-o-y). Decreases in total output were observed in both OECD Europe (-3.9% y-o-y) and the OECD Americas (-1.4% y-o-y). Contrarily, output in OECD Asia Oceania increased (+2.1% y-o-y), led by a rise in naphtha output (13.4% y-o-y).

Total OECD net deliveries of total products decreased by 1.2% in June 2019 compared to June 2018. Following the trend in May, decreases in the demand for the majority of products were observed in all OECD regions. The largest decrease in net deliveries was observed in OECD Europe (-2.2% y-o-y), followed by OECD Asia Oceania (-2.0% y-o-y) and the OECD Americas (-0.4% y-o-y). Large decreases in deliveries of other products in OECD Europe (-11.2% y-o-y) and total gasoline deliveries in the OECD Americas (-1.5% y-o-y) were also registered.

Total OECD oil stock levels on national territory grew by 133 kt in June 2019 compared to May 2019, closing at 537 million metric tons. Most of the growth came from a stock build registered in OECD Europe (+1334 kt), followed by a stock build in OECD Asia Oceania (+430 kt). On the contrary, a stock draw in the OECD Americas was observed (-1631 kt).

¹ Year-on-year (y-o-y) change over corresponding month of previous year.

Refinery gross output by OECD region

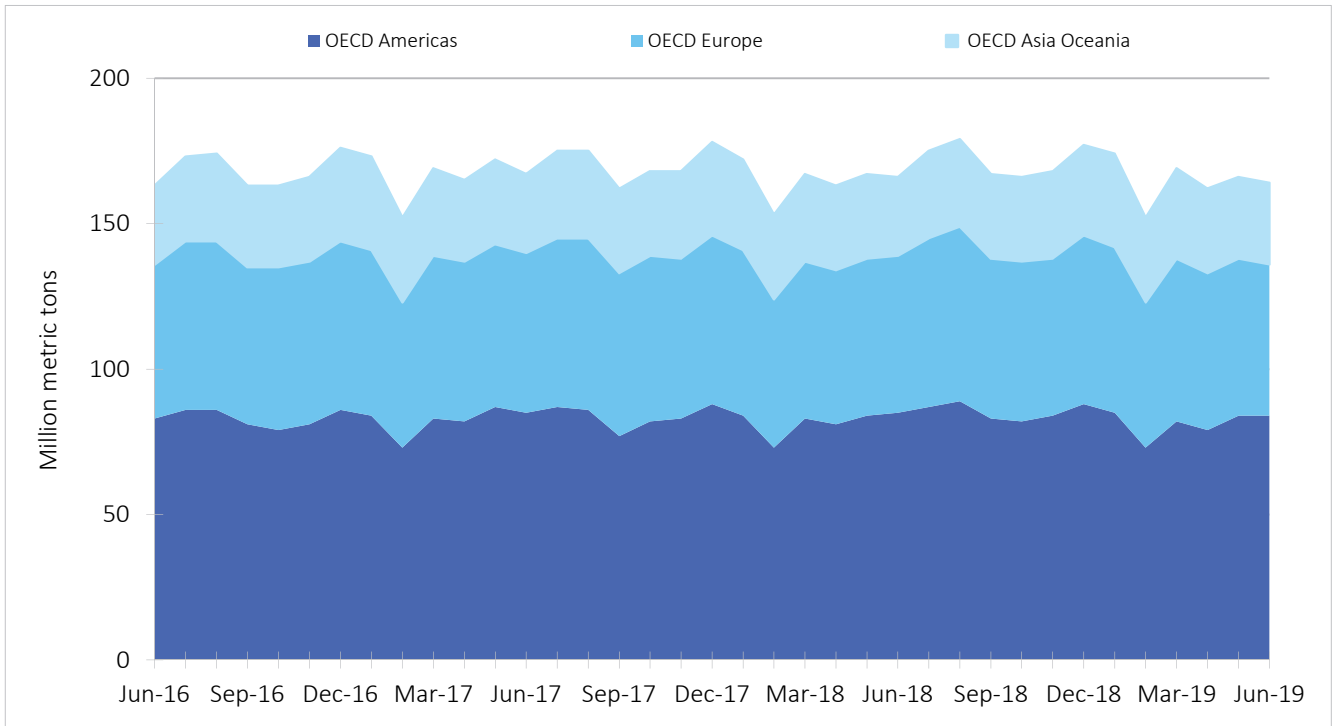

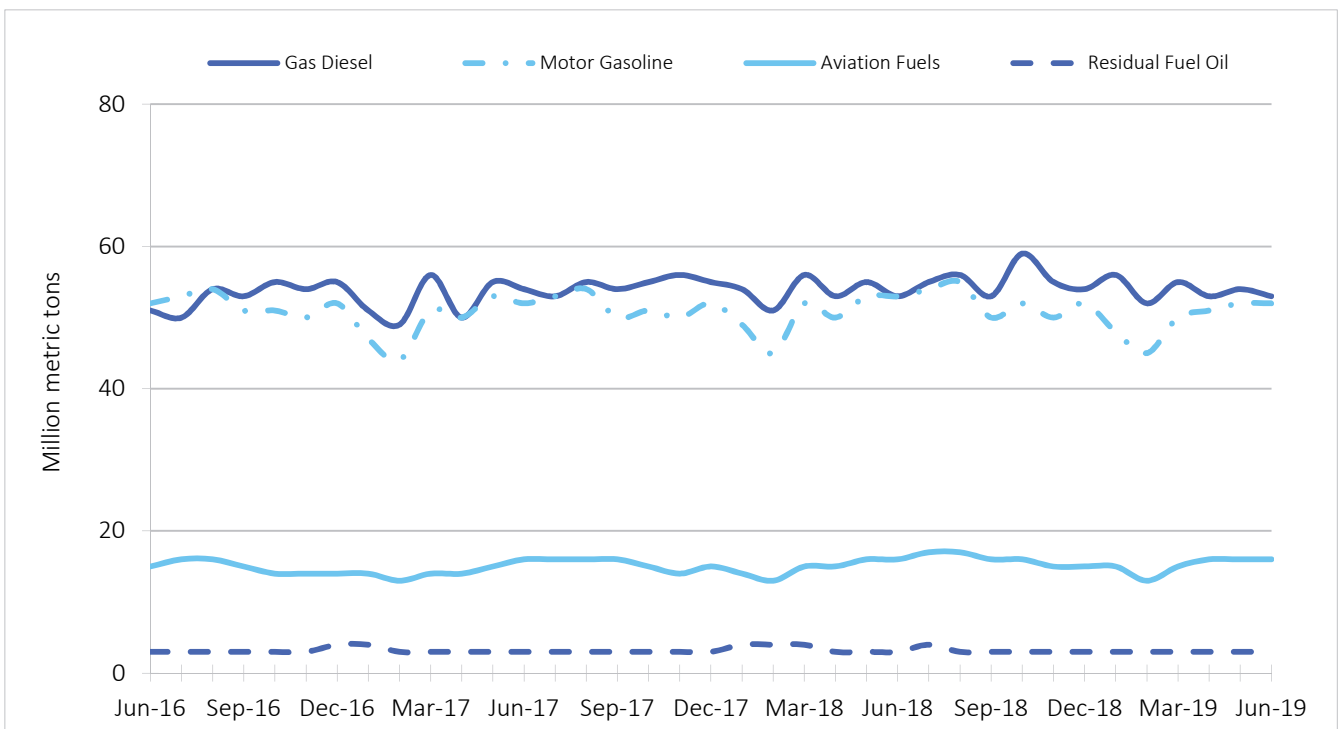

CHART 3

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

United States	June 2019
Israel	January 2010 to June 2019

2) COUNTRY NOTES

- Australia** There is a break in series between December 2017 and January 2018 due to a change in reporting methods, which involves new mandatory reporting for refineries and companies in the oil sector.
- Austria** Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Canada** As of January 2019, Canadian data includes outputs of secondary products from bitumen upgraders. These are reported under "from other sources" under other hydrocarbons, and in "primary product receipts" for refinery gas, gas/diesel oil and petroleum coke.
 There is a break in series between December 2018 and January 2019 as the Canadian Administration launched a new Monthly Refined Petroleum Products survey in the beginning of 2019. The survey includes greater coverage of all products.
 Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
 The Canadian Administration includes condensates and pentanes plus under crude oil.
- France** Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
- Israel** Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
 The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
 The stocks level information is not available at this time.
 The trade breakdown information is not available at this time.
 Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.
- Mexico** Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.
- Netherlands** There is a break in series between December 2017 and January 2018 following the implementation of a new data collection and compilation system. This includes methodological reporting changes, better trade information by country of origin/destination and more accurate stock data.
 As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.

NOTES

- Sweden There is a break in stocks for Refinery Feedstocks and Additives/Oxygenates between December 2017 and January 2018 reflecting additional information collected by the Swedish administration.
- Switzerland There is a break in stocks between December 2017 and January 2018 for refinery feedstocks, as more detailed information of refinery activity is collected by the national administration.
- United States The US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
