CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD indigenous production of crude oil, NGL and refinery feedstocks grew by 2.1% in March 2020 compared to March 2019. This trend was seen in all OECD regions, with the OECD Americas leading this growth (+1.7% y-o-y¹), mainly due to an increase in the United States of 7.8% on a year-on-year basis. OECD Europe production experienced a 2.5% increase on a year-on-year basis, with continuously increasing production in Norway (+18.9% y-o-y). Meanwhile, indigenous production in OECD Asia Oceania also increased by 25.6% y-o-y. Overall, total OECD production grew by 6.9% in the first quarter of 2020.

Total OECD refinery gross output of total products decreased by 6.2% in March 2020 compared to March 2019. This decline was mainly driven by declines in the outputs of total gasoline (-6.5% y-o-y) and total kerosene (-18.7% y-o-y). This pattern was observed across all OECD regions and coincides with lockdowns in several countries related to Covid-19. Output of gas/diesel oil also experienced significant decreases in OECD Asia Oceania (-7.6% y-o-y) and in OECD Europe (-5.6% y-o-y). Overall, total OECD refinery gross output declined by 2.8% in the first quarter of 2020.

Total OECD net deliveries of total products decreased by 9.2% in March 2020 compared to March 2019, driven by decreases in net deliveries of total gasoline (-14.5% y-o-y) and total kerosene (-26.1% y-o-y). This trend was observed in all OECD regions and mainly set by the OECD Americas, where net deliveries of total gasoline and total kerosene fell by 14.4% y-o-y and 24.5% y-o-y, respectively. The major reasons for these decreases were the reduced vehicle usage and travel restrictions imposed due to the Covid-19 pandemic. Naphtha (-6.7% y-o-y), gas/diesel oil (-3.1% y-o-y) and residual fuel oil (-17.9% y-o-y) also experienced considerable decreases in total OECD, with only net deliveries of other products seeing a small increase (+1.5% y-o-y).

Total OECD oil stock levels on national territory increased by 10754 kt in March 2020 compared to closing stock levels in February 2020, and closed at 544 million metric tons. This trend is a reflection of reduced demand of oil products caused by the Covid-19 crisis which led to builds in stocks. Stock builds were observed in the OECD Americas (+6814 kt) and in OECD Europe (+3946 kt), while in OECD Asia Oceania stocks remained stable (-7 kt). The greatest stock build for the total OECD was observed for crude oil, NGL and refinery feedstocks (+ 6988kt), mainly due to large increases in the United States (+4184 kt) and Italy (+1007 kt). Among total oil products, total gasoline and residual fuel oil contributed to pronounced builds in stocks for total OECD, 2420 kt and 1147 kt respectively, while middle distillates experienced a stock draw (-1207 kt).

¹ Year-on-year (y-o-y) change over corresponding month of previous year.

CHART 2

Refinery gross output by OECD region

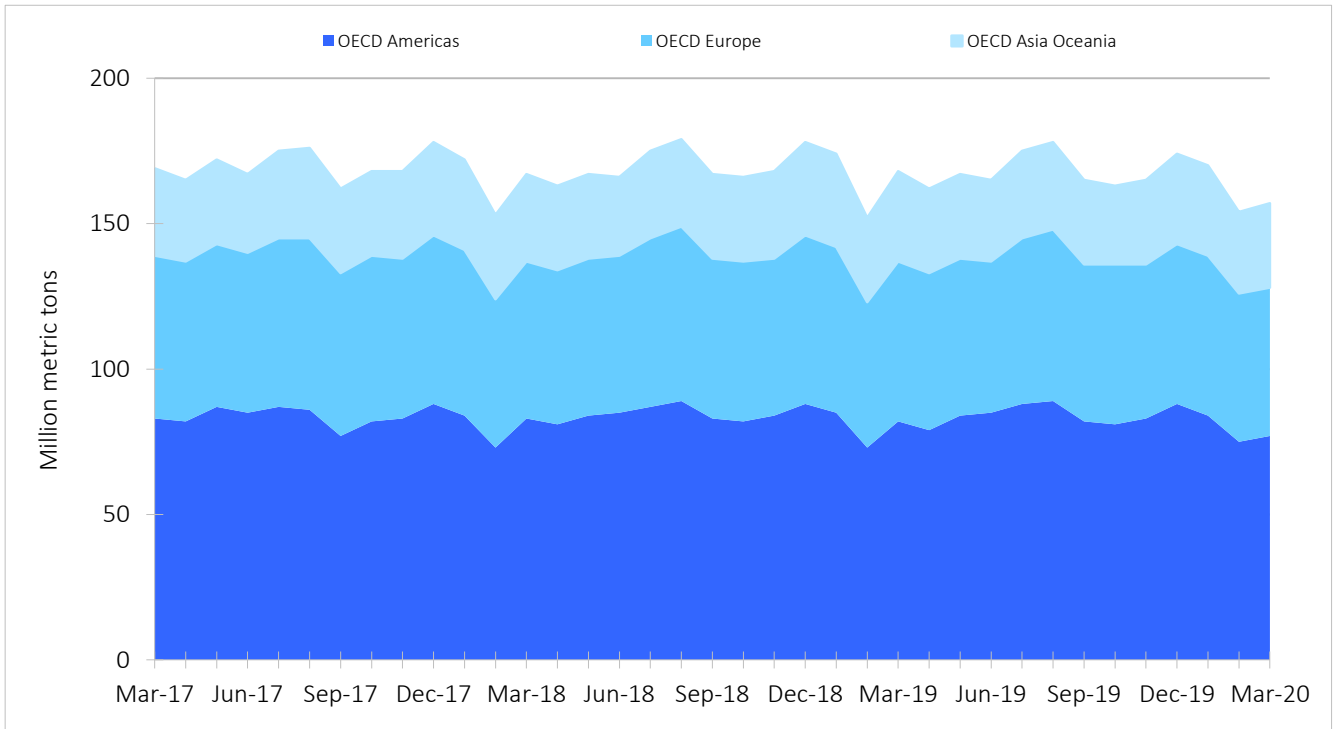

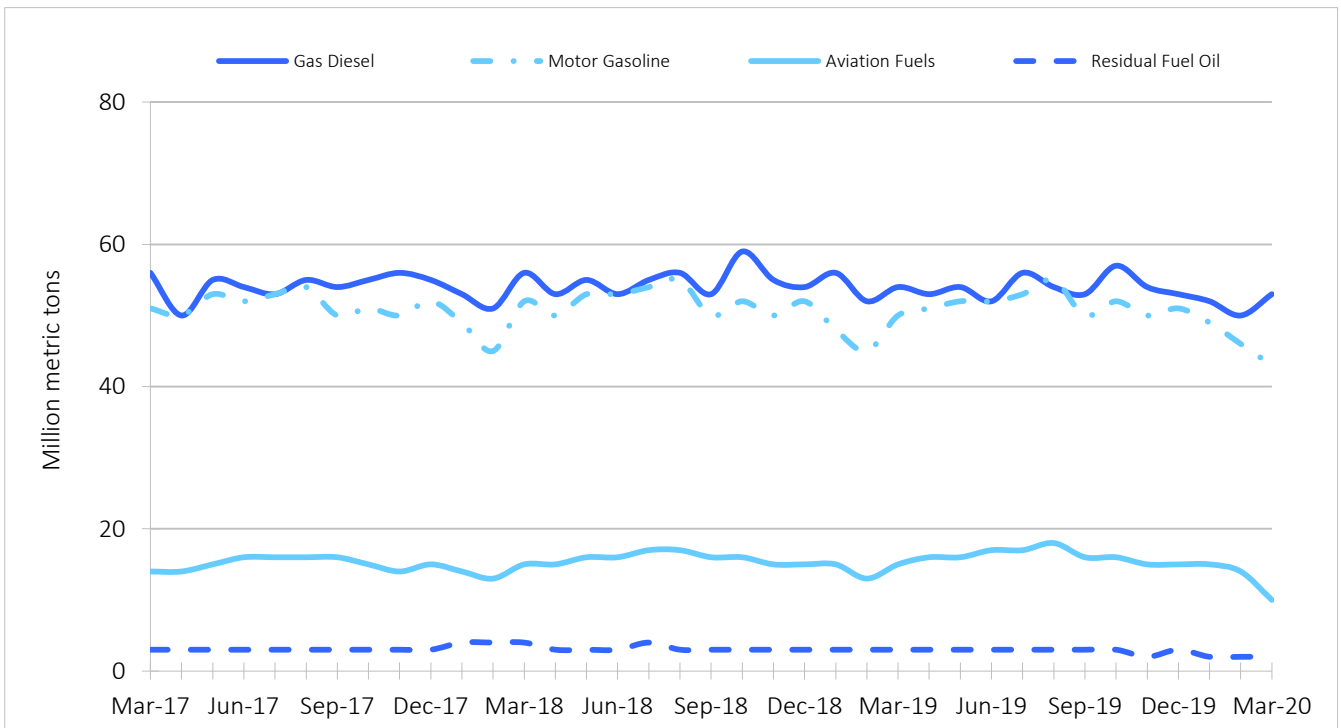

CHART 3

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel	January 2010 to March 2020
Mexico	October 2019 to March 2020

2) COUNTRY NOTES

Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Canada	As of January 2019, Canadian data includes outputs of secondary products from bitumen upgraders. These are reported under "from other sources" under other hydrocarbons, and in "primary product receipts" for refinery gas, gas/diesel oil and petroleum coke. There is a break in series between December 2018 and January 2019 as the Canadian Administration launched a new Monthly Refined Petroleum Products survey in the beginning of 2019. The survey includes greater coverage of all products. The Canadian Administration includes condensates and pentanes plus under crude oil. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Chile	The most recent data on inland deliveries for Chile are preliminary. This data are updated within two months following the first publication.
Finland	Starting from August 2019, information on international marine bunkers are not available but included in the "Gross inland deliveries obs." of total fuel oil and gas/diesel due to confidentiality reasons.
France	French data includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
Israel	The stocks level information is not available at this time. The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. The trade breakdown information is not available at this time. Petroleum coke is included by Israeli Administration in the amounts of other petroleum products. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.

NOTES

United States The US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
