CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 1.6% in April 2017 compared to April 2016. The growth was mainly driven by higher production in the OECD Americas (+1.9% year-on-year¹), with the highest growth observed in Canada (+8.5% y-o-y). OECD Europe experienced modest growth in production (+1.5% y-o-y), led by Norway (+3.8% y-o-y). Overall, total OECD production decreased slightly by 0.8% in January to April 2017 on a year-to-date basis².

Total OECD refinery gross output of total products increased by 2.7% in April 2017 compared to April 2016, but remained broadly unchanged on a year-to-date basis (+0.4%). The most significant increase was observed for gas/diesel oil in OECD Europe (+6.0% y-o-y), with the largest fall being for residual fuel oil in OECD Asia Oceania (-21.3% y-o-y). Overall, many products in total OECD experienced modest growth due to refinery maintenance within OECD Europe, specifically in Austria, Poland and Sweden.

Total OECD net deliveries of total products decreased in April 2017 compared to April 2016 (-0.8% y-o-y), reflecting decreases observed across all OECD regions. The largest decline was observed in OECD Europe (-1.7% y-o-y), driven by a decrease in gas/diesel oil deliveries in Germany (-5.1% y-o-y), France (-4.7% y-o-y) and Italy (-7.8% y-o-y) respectively. While the decline in the OECD Americas was also driven by gas/diesel oil (-4.0% y-o-y), the decrease in net deliveries in OECD Asia Oceania was mainly due to residual fuel oil (-19.4% y-o-y).

Total OECD stock level of total oil on national territory remained high in April 2017 at 566 million metric tons, 0.8% higher than in April 2016. Despite a stock draw in crude oil, NGL and feedstocks, the stocks of total oil grew by 1,796kt during April 2017 due to a high stock build of total products across all OECD regions.

1 Year-on-year (y-o-y) change over corresponding month of previous year.

2 Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to April 2017

2) COUNTRY NOTES

Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Canada	There is a break in series between December 2015 and January 2016 data as the Canadian Administration is using a new methodology from January 2016 data onwards. Under the new methodology crude oil includes condensates and pentanes plus for all flows and motor gasoline imports are better accounted for. Furthermore, reporting has been improved with an appropriate use of the flow "recycled products". Revisions to historical data are pending. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
France	Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. The trade breakdown information is not available at this time. The stocks level information is not available at this time. Revisions are pending. Petroleum coke is included by Israeli Administration in the amounts of other petroleum products. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Netherlands	As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
Sweden	In January 2017 Statistics Sweden added more companies to their new data collection system, causing a stock break between December 2016 and January 2017.
Turkey	The Turkish Administration changed its methodology of reporting marine diesel. As of January 2013, amounts of marine diesel are included under fuel oil. Prior to that month, these amounts were included under gas/diesel.
United States	Following a methodological change in the US Energy Information Administration (EIA) reporting, industry stocks of crude oil for the United States exclude crude oil lease stocks (crude oil stocks held at producing sites) beginning with data for January 2005.
