CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas fell marginally in April 2017 compared to April 2016 (-0.2%). Production declined in the OECD Americas and OECD Europe (-0.6% and -1.9% y-o-y¹ respectively), offsetting the increase in OECD Asia Oceania (+7.2% y-o-y). The latter was driven by Australia, where in year-to-date² terms indigenous production has increased by 8.6%, driven by Surat-Bowen and Carnarvon basin production.

Total OECD imports (entries)³ of natural gas were 7.4% higher year-on-year in April 2017, with growth across all OECD regions. The year-on-year increase in OECD Europe (+8.3%) was particularly notable. Imports into Turkey increased 19.6% year-on-year as demand in the country continues to increase.

Total OECD exports (exits)³ of natural gas also increased year-on-year in April 2017 (+10.1%). Again exports increased in all OECD regions, with particularly strong year-on-year growth in the OECD Americas and OECD Europe (+18.1% and +6.1% respectively). Most notable, the US was a net exporter of natural gas for the first time in April 2017, reflecting the significant increase in LNG exports. US natural gas exports are expected to continue growing due to infrastructure improvements, including new gas pipelines and LNG facilities. Among others the Sabine Pass facility in Louisiana has played a key role in this growth, with the third LNG train starting operations in March 2017.

Overall, total OECD gross consumption of natural gas slightly decreased in April 2017 compared to April 2016 (-0.7%). Similarly, on a year-to-date basis gross consumption of natural gas decreased by 0.4%. The decrease in consumption in the OECD Americas (-6.1% y-o-y) managed to offset growth in OECD Asia Oceania and OECD Europe (+1.7 and +8.8% y-o-y respectively).

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to April 2017

2) COUNTRY NOTES

Australia	Prior to July 2015, total exports of natural gas are estimated by the administration, based on annual (July to June) and quarterly data. The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	There is a break in stocks for natural gas between December 2015 and January 2016. From January 2016 data onwards Statistics Canada is officially publishing data on stock levels. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated. Revisions are pending.
United Kingdom	Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
