CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas fell by 4.9% in November 2020 compared with November 2019. This decrease was seen across all OECD regions, but was strong in the OECD Americas (-4.5% y-o-y¹) and OECD Europe (-9.6% y-o-y). In OECD Asia Oceania the decrease in indigenous production was 1.7% year-on-year. In the OECD Americas, production in the United States continued to be lower than last year's (-5.0% y-o-y), while in OECD Europe, the Netherlands (-23.0% y-o-y), the United Kingdom (-15.3% y-o-y) and Norway (-4.4% y-o-y) were the main drivers of lower production. Decreases in the Netherlands were due to ramping down of production of the Groningen field towards its planned closure in 2022.

Total OECD imports (entries)² of natural gas declined by 6.6% in November 2020 on a year-on-year basis. This trend was also observed across all OECD regions, with the decrease being led by OECD Europe (-7.4% y-o-y), followed by the OECD Americas (-8.5% y-o-y) and OECD Asia Oceania (-2.0% y-o-y). Imports from OECD countries (-9.6% y-o-y) were more impacted than those from non-OECD countries (-2.6% y-o-y), with imports from Russia (+36.3% y-o-y) and Tunisia (+148.2%) on the rise. In terms of pipeline and LNG split, decreases in both LNG (-15.4% y-o-y) and pipeline (3.0% y-o-y) imports were observed in the total OECD.

Total OECD exports (exits)² of natural gas remained relatively stable in November 2020 compared to the same month last year (-0.4% y-o-y). Increases in the OECD Americas (+10.8% y-o-y) and OECD Asia Oceania (+6.2% y-o-y) were offset by a decrease in OECD Europe (-7.7% y-o-y). Total OECD exports of LNG increased by 22.3% y-o-y, while pipeline exports decreased by 7.1% y-o-y.

Gross consumption of natural gas in total OECD decreased by 7.1% in November 2020 compared to November 2019. While consumption decreased in all regions, the OECD Americas saw a large drop (-11.0% y-o-y), due to decreases in the United States (-12.0% y-o-y) and Canada (-7.4% y-o-y). Decreases in OECD Asia Oceania (-3.9% y-o-y) and OECD Europe (-1.3% y-o-y) were milder, with some countries showing increased consumption.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

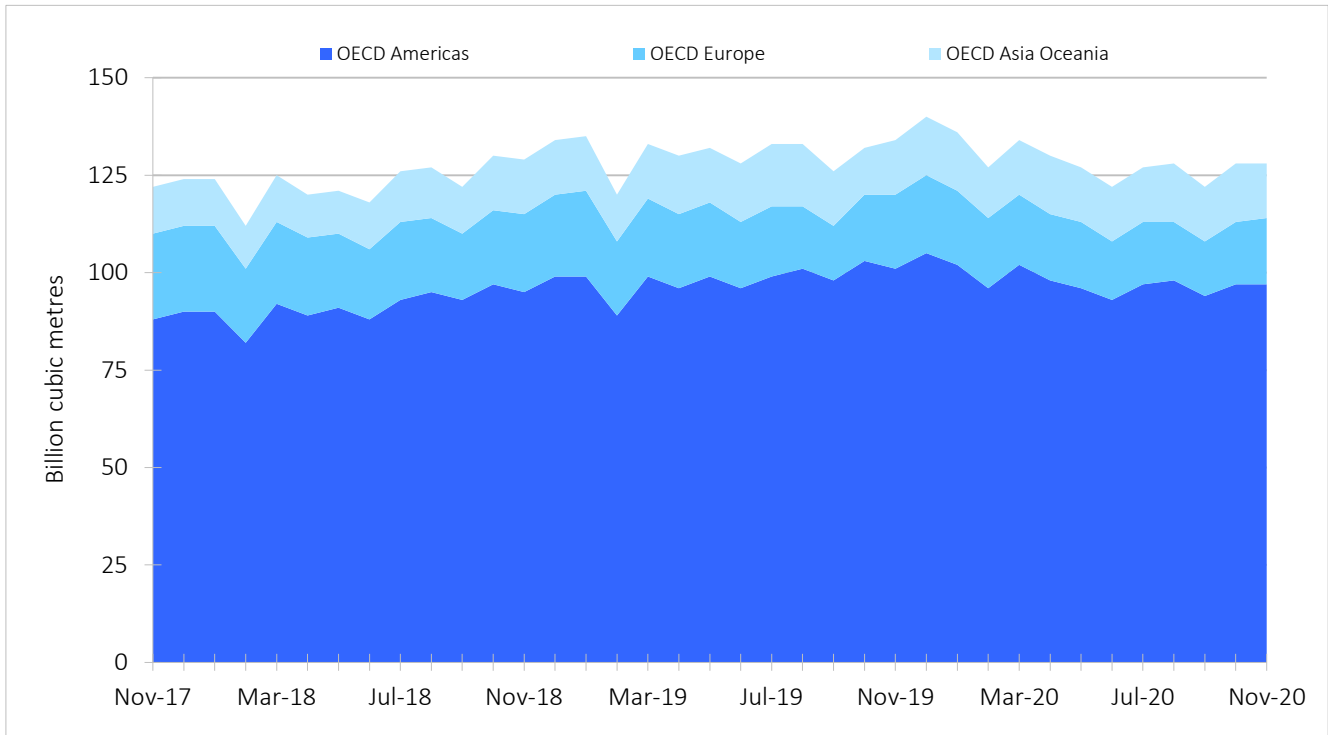

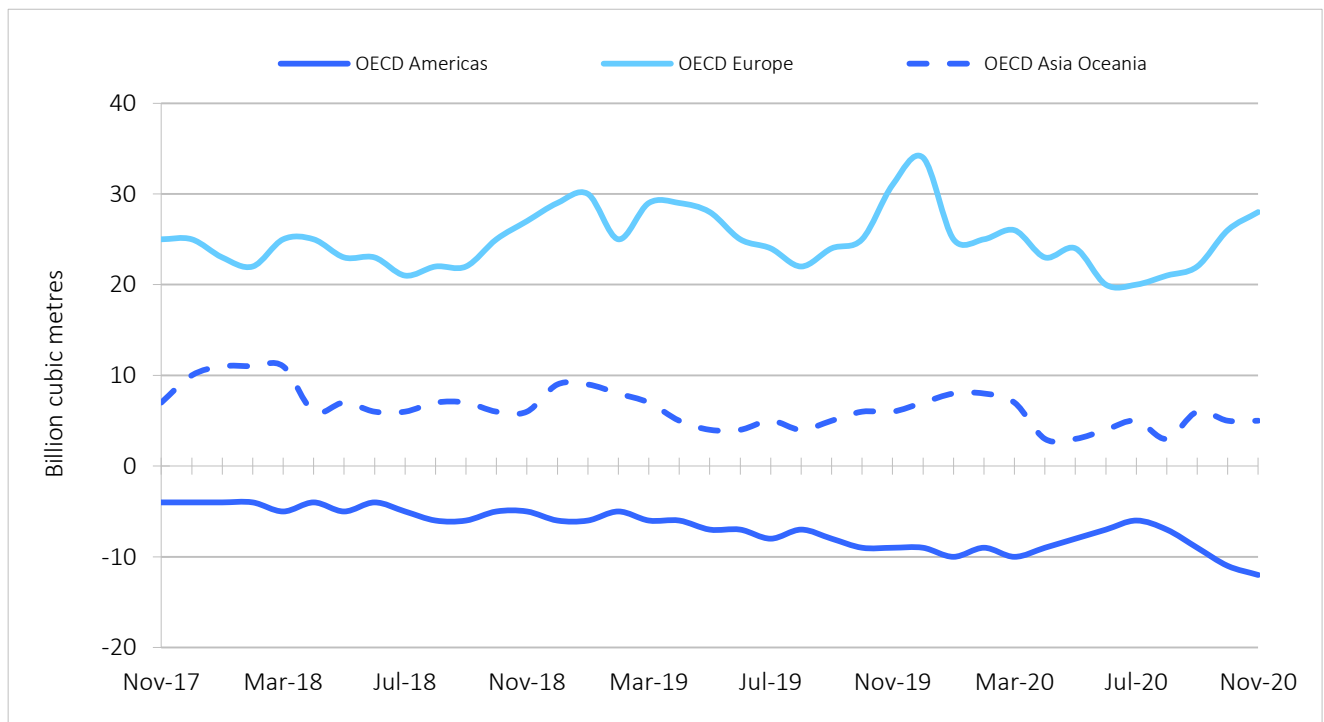

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Mexico	November 2020
Israel	January 2010 to November 2020

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Finland	Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Netherlands	Starting with January 2019, more complete trade data is reported based on better information from the GATE terminal. Revisions for historical series are pending.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other. There is a break in stocks between March and April 2019 due to inclusion of stock held at LNG terminals.
