CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas fell by 4.9% in December 2020 compared to the same month last year, with the drop being led by the OECD Americas (-4.7% y-o-y¹). In OECD Europe production fell (-7.5% y-o-y) due to reductions in Norway (-4.5% y-o-y), the Netherlands (-17.9% y-o-y) and the United Kingdom (-7.5% y-o-y). In OECD Asia Oceania (-3.6% y-o-y), lower production in Australia (-3.8% y-o-y) drove the region's trend. Looking at 2020 as a whole, production was down 2.0% on a year-to-date basis as a result of production cuts in OECD Europe (-7.6% y-t-d²) and the OECD Americas (-1.3% y-t-d). In OECD Asia Oceania production in 2020 remained at the same level as 2019 (+0.4% y-t-d).

Total OECD imports (entries)³ of natural gas declined by 3.5% in December 2020 on a year-on-year basis. This trend was driven by OECD Europe (-5.7% y-o-y) with an 11.4% y-o-y decrease of imports from outside the OECD, and the OECD Americas (-4.0% y-o-y). In OECD Asia Oceania there was an increase in imports (+6.9% y-o-y), with an increase from OECD countries of 3.6% (y-o-y). The decrease of total OECD imports were due to a large decrease of LNG imports (-12.4% y-o-y), while pipeline imports remained stable (+0.3% y-o-y). On a year-to-date basis, total OECD imports decreased by 5.2%.

Total OECD exports (exits)³ of natural gas saw a 2.5% growth on a year-on-year basis, with the OECD Americas exports on the rise (+12.2% y-o-y). On the other hand, exports from OECD Asia Oceania and OECD Europe fell by 4.5% and 1.1% (y-o-y, respectively). Compared to the same month last year, LNG exports in December 2020 grew by 9.0%, while pipeline exits were up slightly by 0.4% (y-o-y). Compared to 2019, exports for total OECD were 0.9% higher in 2020, driven by an increase in LNG exports (+13.3% y-t-d).

Total OECD gross consumption of natural gas grew in December 2020 (+3.0% y-o-y) compared to December 2019. Growth occurred in OECD Europe (+6.7% y-o-y) and OECD Asia Oceania (+9.3% y-o-y), while in the OECD Americas consumption remained stable at -0.2% y-o-y, driven by a 4.4% decrease in Canada despite moderate growth in Mexico (+6.9% y-o-y) and the United States (+0.2% y-o-y). Total OECD gross consumption of natural gas decreased by 2.1% in 2020 compared to 2019, with the OECD Americas (-1.9% y-t-d) and OECD Europe (-3.0% y-t-d) regions being the most affected.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2

Indigenous production of natural gas by OECD region

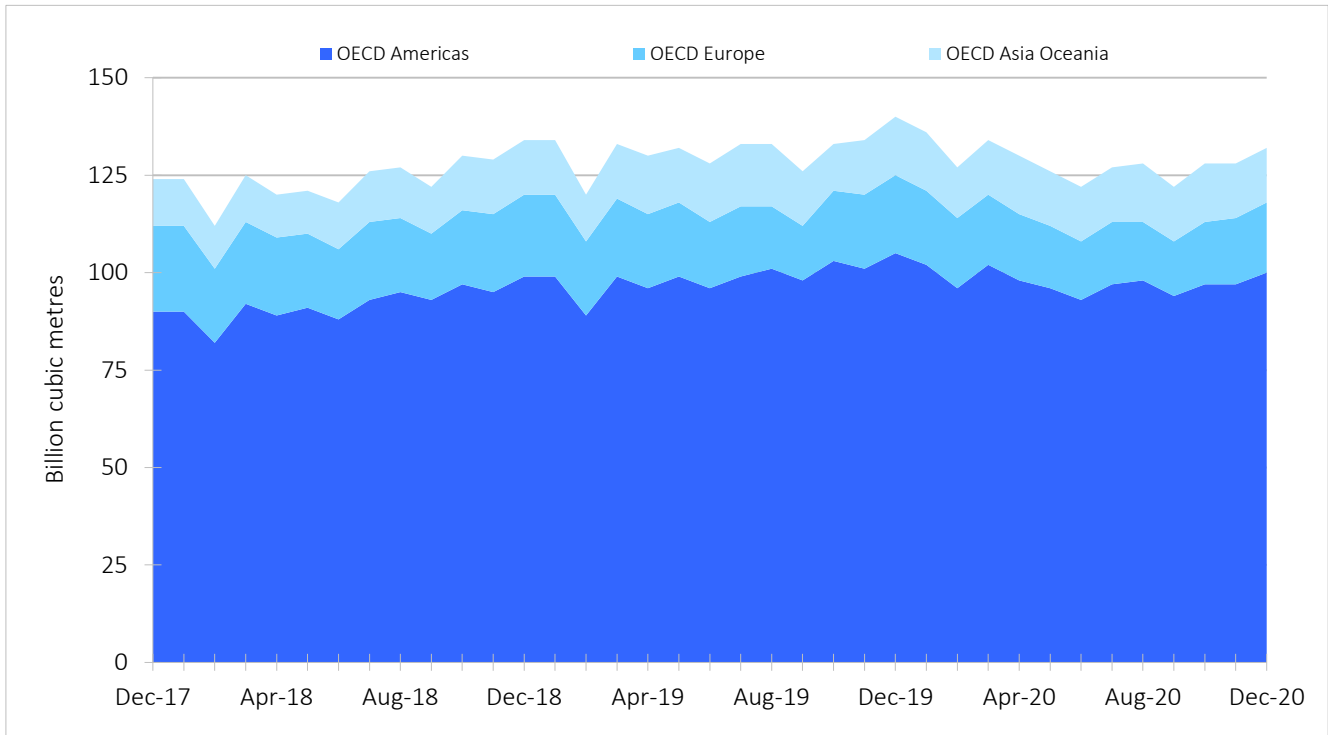

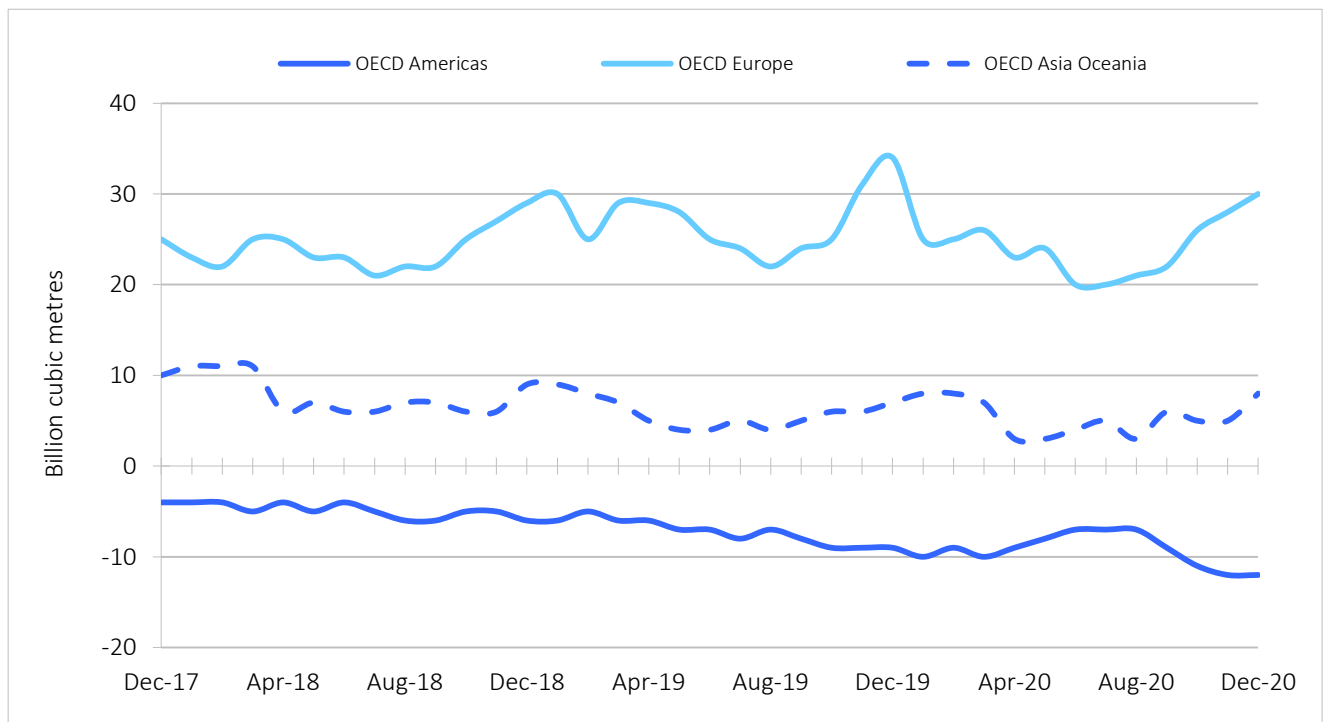

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to December 2020

2) COUNTRY NOTES

A General Note	Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
Australia	The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Finland	Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
Netherlands	Starting with January 2019, more complete trade data is reported based on better information from the GATE terminal. Revisions for historical series are pending.
United Kingdom	Exits to the Isle of Man are reported under Non-specified/Other. There is a break in stocks between March and April 2019 due to inclusion of stock held at LNG terminals.
