CHART 1

Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas increased by 0.9% in May 2017 compared to May 2016. This was driven by increased production in Australia (+39.2% y-o-y¹) with above nameplate capacity production at the Australia Pacific LNG project. On the other hand, indigenous production of natural gas fell in OECD Europe (-8.9% y-o-y) coinciding with the start of maintenance season.

Total OECD imports (entries)² of natural gas also increased in May 2017 compared to May 2016 (+5.2%). Imports to OECD Europe and OECD Asia Oceania increased on a year-on-year basis (+5.6% and +10.0% respectively). In particular, Japan saw a strong year-on-year growth of natural gas imports (+13.0%). Across OECD Europe, most countries reported increased imports of natural gas, with the UK being amongst the exceptions (-16.6% y-o-y). The drop in imports coincides with an increase in exports (+3.8% y-o-y) and the Rough storage facility suspending natural gas injections.

Total OECD exports (exits)² of natural gas increased by 10.4% in May 2017 compared to May 2016. Increased production in Australia culminated in an increase in exits (+76.1% y-o-y). Exports also increased significantly in the OECD Americas (+16.4% y-o-y). May 2017 saw the first ever shipment of US LNG to Northwest Europe, with a cargo leaving from Sabine Pass towards the Gate LNG terminal in the Netherlands.

Overall, total OECD gross consumption of natural gas fell marginally by 0.5% in May 2017 compared to May 2016, mirroring the year-to-date³ trend (-0.4%). The increase in consumption in OECD Europe (+8.1% y-o-y) balanced out the drops in OECD Asia Oceania and the OECD Americas (-4.7% and -3.2% y-o-y respectively).

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Transit volumes are included. Trade amounts include intra-regional trade.

3. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

CHART 2

Indigenous production of natural gas by OECD region

CHART 3

Net trade of natural gas by OECD region¹

1. Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to May 2017

2) COUNTRY NOTES

Australia	Prior to July 2015, total exports of natural gas are estimated by the administration, based on annual (July to June) and quarterly data. The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
Belgium	Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
Canada	There is a break in stocks for natural gas between December 2015 and January 2016. From January 2016 data onwards Statistics Canada is officially publishing data on stock levels. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
Iceland	There is no natural gas data for Iceland, as there is neither production nor consumption.
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Mexico	Observed gross inland deliveries of natural gas from January 2013 onwards are estimated. Revisions are pending.
United Kingdom	Beginning with January 2016, exits to the Isle of Man are reported under Non-Specified/Other. Prior to this date, exits to the Isle of Man were included in exits to Ireland.
