## CHART 1

### Gross consumption of natural gas by OECD region

Total OECD indigenous production of natural gas decreased by 11.1% in February 2021 compared to February 2020. The negative trend was led by the OECD Americas (-12.0% y-o-y<sup>1</sup>) and OECD Europe (-12.0% y-o-y), mostly driven by contributions from the United States (-12.0% y-o-y), Norway (-8.9% y-o-y) and the United Kingdom (-20.4% y-o-y). OECD Asia Oceania experienced a less pronounced drop (-3.2% y-o-y), driven mainly by Australia (-4.6% y-o-y). Overall, total OECD indigenous production of natural gas decreased by 6.9% on a year-to-date basis<sup>2</sup>.

Total OECD imports (entries)<sup>3</sup> of natural gas declined by 1.6% in February 2021 on a year-on-year basis. This trend was led by OECD Europe (-8.7% y-o-y) with a 13.3% y-o-y decrease of imports from OECD countries. Meanwhile, increases of 19.9% and 8.6% year-on-year were observed in OECD Asia Oceania and the OECD Americas, respectively. In terms of pipeline and LNG split, a decrease was observed for LNG imports (-5.1% y-o-y) while pipeline imports increased slightly (+0.2% y-o-y) in the total OECD.

Total OECD exports (exits)<sup>3</sup> of natural gas decreased by 8.6% in February 2021 compared to February 2020. The trend was again led by OECD Europe (-15.5% y-o-y) while both OECD Asia Oceania (+1.5% y-o-y) and the OECD Americas (+0.3% y-o-y) experienced moderate growth. Total OECD pipeline exports decreased by 8.9% y-o-y. Similarly, total OECD exports of LNG also experienced a decrease of 7.8% year-on-year.

Total OECD gross consumption of natural gas increased by 1.7% in February 2021 compared to the same month last year. Year-on-year consumption rose in OECD Europe by 6.2% and OECD Asia Oceania by 3.6%, driven mostly by increased consumption in Germany (+17.1% y-o-y) and Japan (+14.1% y-o-y). Contrarily, the OECD Americas experienced a moderate drop of 1.0% where Canada (-7.2% y-o-y) led the negative trend. Overall, total OECD gross consumption of natural gas increased by 2.4% y-t-d.

1. Year-on-year (y-o-y) change over corresponding month of previous year.

2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

3. Transit volumes are included. Trade amounts include intra-regional trade.

## NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:  
<http://www.iea.org/t&c/termsandconditions/>

### 1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to February 2021

### 2) COUNTRY NOTES

- A General Note Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the national boundaries of the country.
- Australia The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas from Australia.
- Austria Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Belgium Most recent data on origins of imports and final destinations of exports of LNG are the best estimates from the Belgian Administration based on available preliminary data.
- Canada Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- Finland Finland is reporting stock levels as of January 2019. Therefore, there is a break in stock levels between December 2018 and January 2019.
- Iceland There is no natural gas data for Iceland, as there is neither production nor consumption.
- Israel The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
- Information is based on data published by the Ministry of Energy and Water Resources as well as the Central
- Mexico Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.
- United Kingdom Exits to the Isle of Man are reported under Non-specified/Other.
- There is a break in stocks between March and April 2019 due to inclusion of stock held at LNG terminals.
