CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL and refinery feedstocks grew by 5.9% in June 2017 compared to June 2016. This was driven by a 6.5% increase in production from the OECD Americas with Canadian production growing strongly (+22.2% y-o-y¹) reflecting the rebound from last year's wildfires in Alberta. Overall, total OECD production levels grew by 1.1% in the first semester of 2017 compared to the first semester of 2016.

Total OECD refinery gross output of total products increased by 2.5% in June 2017 compared to June 2016 despite a fall in OECD Asia Oceania (-2.9% y-o-y). The decrease in refinery output of residual oil in this region (-14.9% y-o-y) coincides with a drop in residual fuel oil demand in Japan following the restart of Takahama Nuclear Power Plant Unit 3 at the start of June. Refinery gross output in the OECD Americas and OECD Europe showed year-on-year growth in June (+2.8% and +4.9% y-o-y). Overall, total OECD refinery gross output of total products grew by 1.3% in the first half of 2017 compared to the same period last year.

Total OECD net deliveries of total products also grew in June 2017 compared to June 2016 (+3.3%), showing moderate growth on a year-to-date² basis (+0.7%). The year-on-year growth was driven by the OECD Americas and OECD Europe (+2.3% and +5.6% respectively). The latter saw a significant increase in net deliveries of total products in France and Germany (+12.5% and +6.7% y-o-y).

Total OECD stock levels of total oil on national territory were lower in June 2017 than June 2016 and stood at 560 million metric tons. In particular, closing stocks of total oil in the United States fell in the second quarter of 2017 due mainly to the sale of crude oil from the US Strategic Petroleum Reserve.

¹ Year-on-year (y-o-y) change over corresponding month of previous year.

² Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

CHART 2

Refinery gross output by OECD region

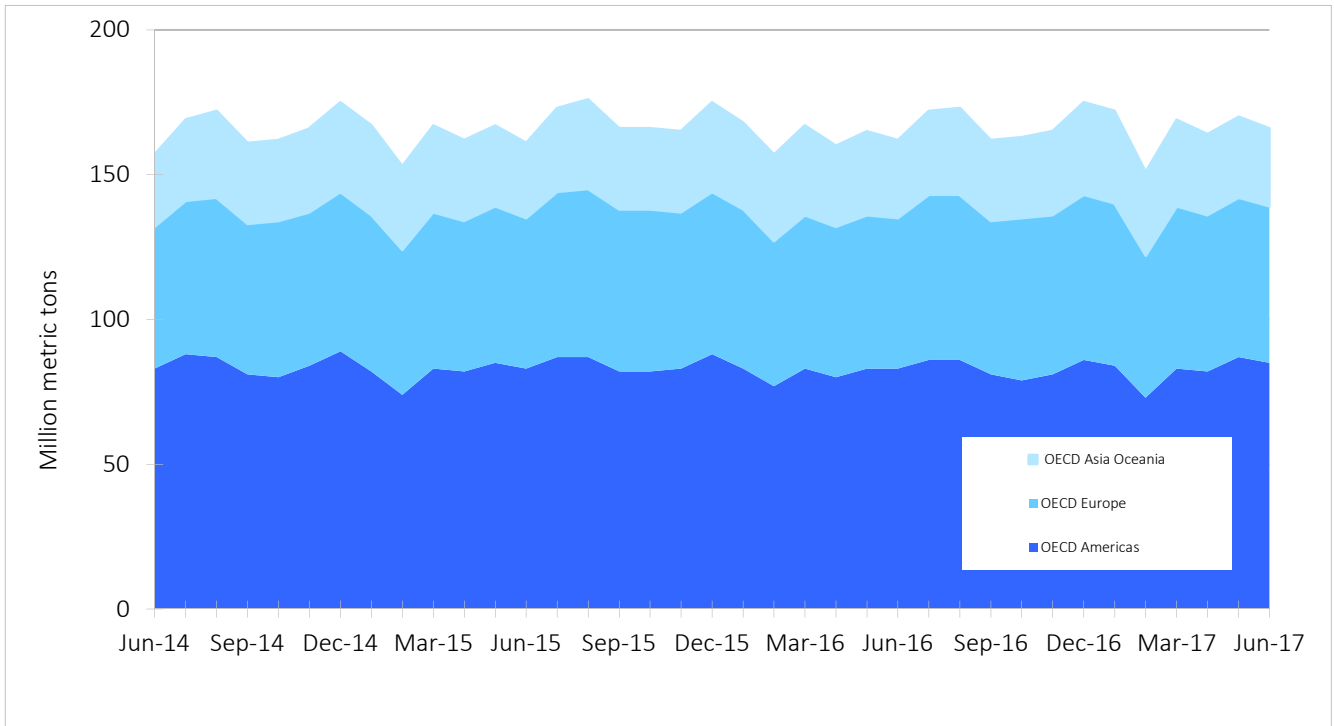

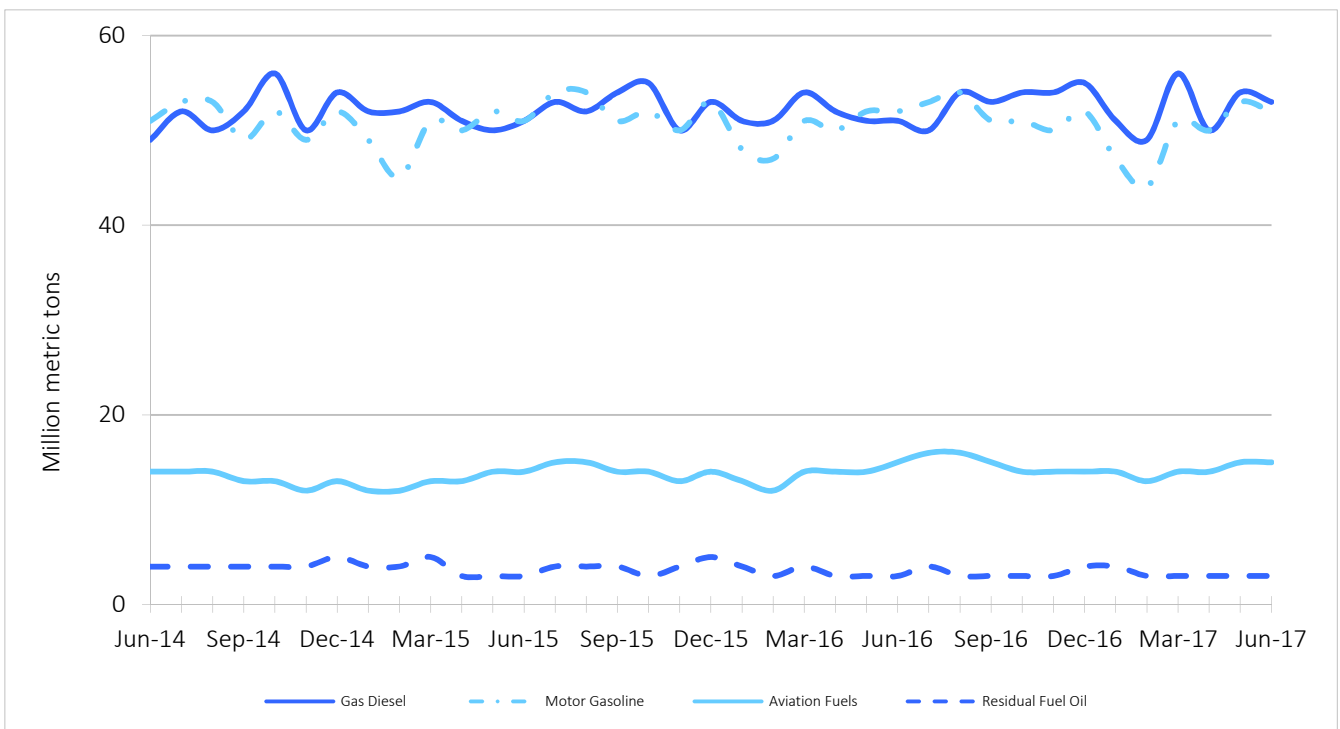

CHART 3

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Denmark	June 2017
Israel	January 2010 to June 2017

2) COUNTRY NOTES

Australia	Starting from January 2017 gas/diesel oil and motor gasoline closing stock data reflect the inclusion of new companies in the Australian data collection system.
Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Canada	There is a break in series between December 2015 and January 2016 data as the Canadian Administration is using a new methodology from January 2016 data onwards. Under the new methodology crude oil includes condensates and pentanes plus for all flows and motor gasoline imports are better accounted for. Furthermore, reporting has been improved with an appropriate use of the flow "recycled products". Revisions to historical data are pending. Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
France	Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
Israel	The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law. The trade breakdown information is not available at this time. The stocks level information is not available at this time. Revisions are pending. Petroleum coke is included by Israeli Administration in the amounts of other petroleum products. Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
Netherlands	As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
Sweden	In January 2017 Statistics Sweden added more companies to their new data collection system, causing a stock break between December 2016 and January 2017.
Turkey	The Turkish Administration changed its methodology of reporting marine diesel. As of January 2013, amounts of marine diesel are included under fuel oil. Prior to that month, these amounts were included under gas/diesel.

NOTES

United States Following a methodological change in the US Energy Information Administration (EIA) reporting, industry stocks of crude oil for the United States exclude crude oil lease stocks (crude oil stocks held at producing sites) beginning with data for January 2005.

Cyprus

Note by Turkey:

The information in this document with reference to “Cyprus” relates to the southern part of the Island. There is no single authority representing both Turkish and Greek Cypriot people on the Island. Turkey recognises the Turkish Republic of Northern Cyprus (TRNC). Until a lasting and equitable solution is found within the context of United Nations; Turkey shall preserve its position concerning the “Cyprus issue”.

Note by all the European Union Member States of the OECD and the European Union:

The Republic of Cyprus is recognised by all members of the United Nations with the exception of Turkey. The information in this document relates to the area under the effective control of the Government of the Republic of Cyprus.

Israel

The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights; East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
