CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD indigenous production of crude oil, NGL and refinery feedstocks increased by 8.1% in May 2021 compared to May 2020. Among OECD regions, this trend was observed only in the OECD Americas (+11.7% y-o-y¹), led by increases in the United States (+12.8% y-o-y) and Canada (+11.9% y-o-y). On the other hand, OECD Europe registered a decrease in indigenous production (-10.6% y-o-y), due to declines in the United Kingdom (-21.3% y-o-y) and Norway (-6.1% y-o-y). Production in OECD Asia Oceania also declined (-6.4% y-o-y), led by a decrease in Australia (-7.0% y-o-y). Overall, total OECD production fell by 5.0% y-t-d².

Total OECD refinery gross output of total products increased by 11.3% in May 2021 on a year-on-year basis. This increase was driven by growth in outputs of total gasoline (+24.5% y-o-y) and total kerosene (+57.4% y-o-y). This pattern was observed across all OECD regions, especially in the OECD Americas, which experienced an increased total output of 15.8% y-o-y. Overall, total OECD refinery gross output declined by 4.3% on a year-to-date basis.

Total OECD net deliveries of total products increased by 16.8% in May 2021 compared to May 2020, mainly due to increases in net deliveries of total gasoline (+26.5% y-o-y), total kerosene (+77.7% y-o-y) and gas/diesel oil (+8.4% y-o-y). On a year-on-year basis, growth in deliveries was observed for all products in total OECD. The OECD Americas led this trend (+22.8% y-o-y), followed by OECD Europe (13.4% y-o-y). The most pronounced increases in net deliveries of total products, in absolute terms, were observed in the United States (+25.6% y-o-y), the United Kingdom (+61.3% y-o-y) and Italy (+41.7% y-o-y).

Total OECD oil stock levels on national territory increased by 907 kt in May 2021 compared to closing stock levels in April 2021, and closed at 537 million metric tons. Stock builds were observed in OECD Europe (+1170 kt) and OECD Asia Oceania (+1287 kt), while OECD Americas experienced an overall stock draw (-1550 kt). For total OECD, stock builds were observed for total products (+1996 kt), mainly due to stock builds in the United States (+1085 kt) and Japan (+780 kt). On the other hand, crude oil, NGL and refinery feedstocks experienced an overall stock draw (-1089 kt), led by decreased stocks in the United States (-2634 kt).

¹ Year-on-year (y-o-y) change over corresponding month of previous year.

² Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to May 2021

2) COUNTRY NOTES

Austria	Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
Canada	<p>There is a break in series between December 2018 and January 2019 as the Canadian Administration launched a new Monthly Refined Petroleum Products survey in the beginning of 2019. The survey includes greater coverage of all products.</p> <p>As of January 2019, Canadian data includes outputs of secondary products from bitumen upgraders. These are reported under "from other sources" under other hydrocarbons, and in "primary product receipts" for refinery gas, gas/diesel oil and petroleum coke.</p> <p>Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.</p> <p>The Canadian Administration includes condensates and pentanes plus under crude oil.</p>
Chile	The most recent data on inland deliveries for Chile are preliminary. This data are updated within two months following the first publication.
Finland	Starting from August 2019, information on international marine bunkers are not available but included in the "Gross inland deliveries obs." of total fuel oil and gas/diesel due to confidentiality reasons.
France	French data includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
Israel	<p>Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.</p> <p>The trade breakdown information is not available at this time.</p> <p>The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.</p> <p>Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.</p> <p>The stocks level information is not available at this time.</p>
Mexico	Data from October 2019 onwards is preliminary.

NOTES

Starting from January 2018, reporting of LPG imports and deliveries is based on a more comprehensive coverage of the market.

New Zealand There is a break in stocks between December 2020 and January 2021 for crude oil due to better information. Historical revisions pending.

Sweden There are break in stocks between April 2021 and May 2021 for some products. Revisions are pending. Due to methodological changes, there is a break in stocks for additives/oxygenates between December 2019 and January 2020.

United States The US Energy Information Administration (EIA) excludes crude oil lease stocks (crude oil stocks held at producing sites) from industry stocks of crude oil.
