CHART 1

Indigenous production of crude oil, NGL and feedstocks by OECD Region

Total OECD production of crude oil, NGL, and refinery feedstocks grew by 2.0% in July 2017 compared to July 2016. This was driven by an increase in production in the OECD Americas (+3.6% y-o-y¹), where production in the United States grew by 5.7% year-on-year. Indigenous production fell both in OECD Europe and OECD Asia Oceania (-4.8% and -8.8% y-o-y, respectively). Overall, total OECD production levels to date² in 2017 were 1.2% higher.

Total OECD refinery gross output of total products grew by 1.2% in July 2017 compared to July 2016. This was driven by OECD Asia Oceania (+3.1% y-o-y), where refinery gross output of naphtha grew by 18.6%. In OECD Europe, refinery gross output of total kerosene (+6.9% y-o-y) drove the year-on-year increase in refinery gross output of total products (+1.4%). Overall, total OECD refinery gross output of total products grew by 1.2% year-to-date in 2017.

Total OECD net deliveries of total products grew by 3.3% in July 2017 compared to July 2016. Net deliveries grew year-on-year across all OECD regions. Growth was particularly strong in OECD Europe and the OECD Americas (+4.7% and +2.5%, respectively). In OECD Europe net deliveries of gas/diesel oil increased by 7.4% year-on-year and 3.4% year-to-date. This was driven by Germany (+12.1% y-o-y), Turkey (+24.3%) and Poland (30.5%) where industrial production has increased compared to 2016.

Total OECD stock levels of total oil were 1.3% lower in July 2017 than July 2016 and stood at 560 million metric tons. In particular, closing stocks of total oil fell year-on-year in the United States (-2.9%), Germany (-3.6%), and the Netherlands (-6.1%). However, closing stock levels of primary products grew year-on-year and stood at 339 million metric tons at the end of July 2017, these stocks grew in both OECD Asia Oceania and OECD Europe. Whilst, closing stocks of total products declined by -4.2% year-on-year in the OECD, and stood at 221 million metric tons at the end of July 2017. This was driven by OECD Europe and the OECD Americas, where stocks of total products fell by -4.1% and -4.9% year-on-year respectively.

1 Year-on-year (y-o-y) change over corresponding month of previous year.

2 Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.

Refinery gross output by OECD region

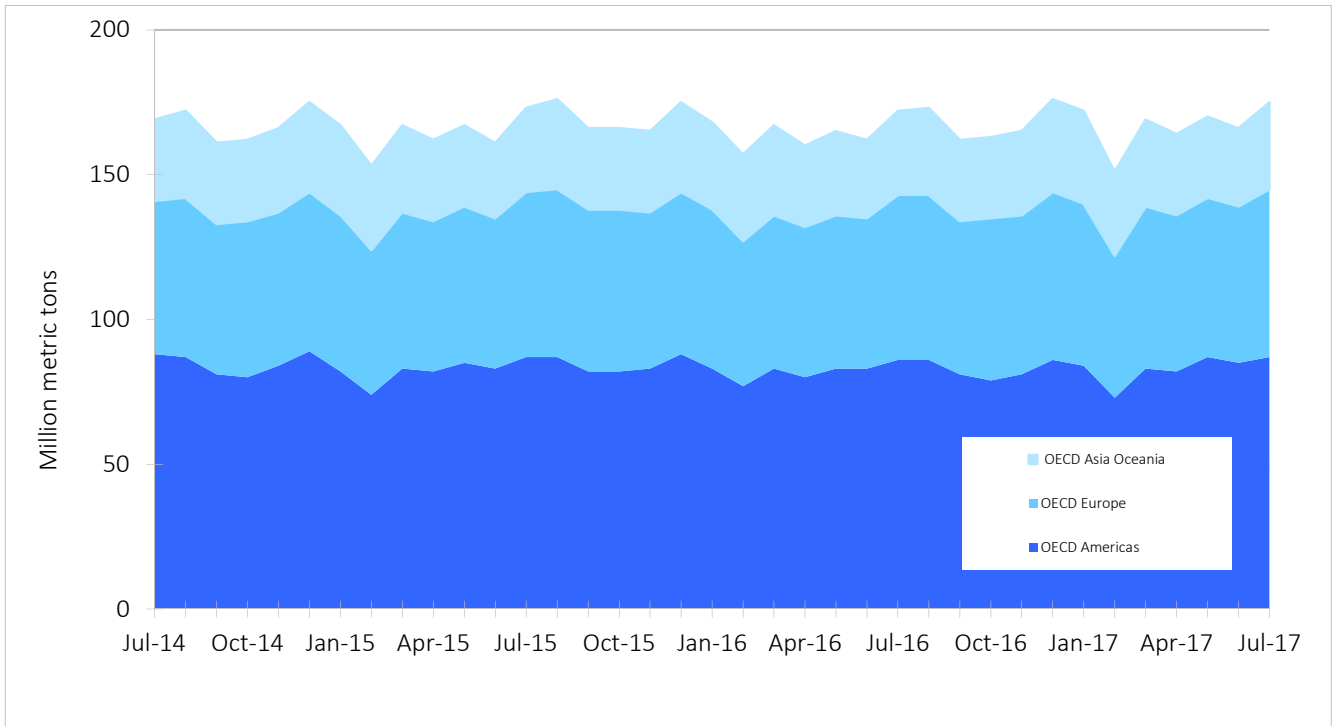

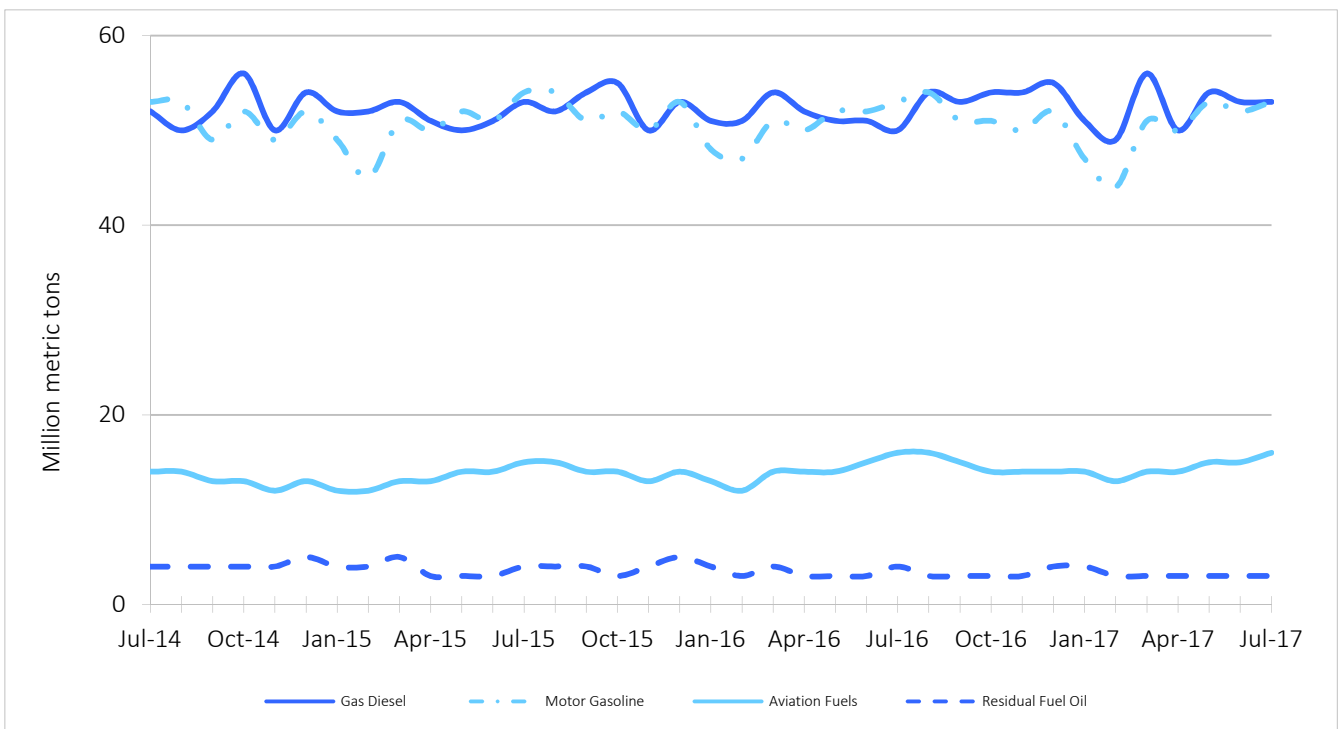

CHART 3

OECD oil deliveries by main product group

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website:
<http://www.iea.org/t&c/termsandconditions/>

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to July 2017

2) COUNTRY NOTES

- Australia** Starting from January 2017 gas/diesel oil and motor gasoline closing stock data reflect the inclusion of new companies in the Australian data collection system.
- Austria** Most recent data are the best estimates from the Austrian national administration, based on available preliminary data. Data are usually finalised within three months following the first publication.
- Canada** There is a break in series between December 2015 and January 2016 data as the Canadian Administration is using a new methodology from January 2016 data onwards. Under the new methodology crude oil includes condensates and pentanes plus for all flows and motor gasoline imports are better accounted for. Furthermore, reporting has been improved with an appropriate use of the flow "recycled products". Revisions to historical data are pending.
 Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.
- France** Following a methodological change in the French statistics coverage, data from January 2017 includes the overseas departments (French Guiana, Guadeloupe, Martinique, Mayotte and Reunion).
- Israel** The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities. The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and Israeli settlements in the West Bank under the terms of international law.
 The trade breakdown information is not available at this time.
 The stocks level information is not available at this time. Revisions are pending.
 Petroleum coke is included by Israeli Administration in the amounts of other petroleum products.
 Information is based on data published by the Ministry of Energy and Water Resources as well as the Central Bureau of Statistics.
- Netherlands** As of December 2016, large amounts of fuel oil are reported under other products due to their chemical properties.
- Sweden** In January 2017 Statistics Sweden added more companies to their new data collection system, causing a stock break between December 2016 and January 2017.
- Turkey** The Turkish Administration changed its methodology of reporting marine diesel. As of January 2013, amounts of marine diesel are included under fuel oil. Prior to that month, these amounts were included under gas/diesel.

NOTES

United States Following a methodological change in the US Energy Information Administration (EIA) reporting, industry stocks of crude oil for the United States exclude crude oil lease stocks (crude oil stocks held at producing sites) beginning with data for January 2005.
